

them together making a single panorama out of them. It is a great way to create panoramic shots if your phone does not have the feature natively.

Upload a best looking photo

Whenever photos are uploaded, Google+ automatically picks out the best one and auto-enhances it. Auto-Enhancement corrects photo color, overexposure, reduces noise, fixes red-eye, etc. Because of this you get the best looking photos to share with your friends.

Manually edit a photo

If you're not satisfied with the auto enhanced photo, Google+ allows you to manually edit it. The editor offers functions like crop, rotate, resize and, also

allows you to share it with your friends.

Search tips Search for interactions

You can search for an old interaction between you and anyone in your circles, it could be a +1, a comment or +1 on a comment. To find it, type names of both the users between double quotes in the Google+ search bar and you'll get the result. eg: "one name" "another name"

Search for an interaction within a community

Similarly, you can search for an interaction within a community. Go to the community's news stream and in the built-in search bar type names of both users in double quotes followed by community name without

Making GIFs is hardly time-consuming now

Google+ search and type the keyword within double quotes followed by the date in Month Year format. eg: "iPhone 5" September 2012.

Search for an old post by you

If you've posted something ear-

Hangouts tips Add funny animations to Hangouts

Have more fun while having Hangouts by adding some funny animations to it. Just type any of this in 'Send a message' box /ponies, /pitchforks, /ponystream, /bikeshed, /shydino or ^^vv<><>ba(enter) and enjoy the moment.

Shift + Space - Scroll up stream
J - Single post down scroll
K - Single post up scroll
Q - Jump to chat
Enter - Start comment
Tab + Enter - End comment

Android Know where you've left off

Google+ app on Android now lets you know where you've left off reading the posts and also when you're done. Tap the smiling bell icon within the notifications and you'll get it right over there.

 Adding filters
Instead of tapping the EDIT button in publish while uploading a photo, you can just long-press on the photo to edit it and apply filter. 

Searching for old posts by you

allows you to add filters to the photo. Along with this you can also add decorations like eyeballs, beards, bubbles, etc.

Create a meme from your photo

You can instantly create a meme with Google+. Just add a photo to 'Share What's New' box and there Google+ will offer an option to add a block text to it.

Make a collage of your photos

If you take series of photos with the same subject, Google+ will make a beautiful col-

lages out of it to share it with your friends.

Search for posts by time

If you can't find a post but know its date or month of posting, you can search for it easily. Just go to Google search engine (not Google+ search), then type in: plus.google.com / your-profile's-url/ and then in the Search tools select the time.

Search for post by keyword

If you don't find a post but know a keyword within it and the time of post, go to

Google+ search and then go to More which is on the top menu bar. This will filter the search results and show posts only by you. You can use the same process to search for posts by other people as well.

Find who shared your blog post

If you own a blog that has the +1 button to share a link or post and if you want to know who all have shared posts from your blog, you can do it by searching for your blog's URL in the Google+ search.
