

Xperia Z Ultra Priced

Sony's latest powerhouse and a direct competitor to the Galaxy Note 2 will cost 600 pounds, according to retailer Clove. <http://dgit.in/14enfrT>

Twitter for BlackBerry

Twitter app for BlackBerry received an update which brings some latest image tweaks and in-line tweet details

Amazon Kindle Fire HD

E-book reader-cum-tablet wannabe!

Technically an Android device, Amazon has skinned the Kindle Fire HD's interface heavily.

It is clear that Amazon isn't cutting any corners on the build quality. But, the power key and the volume rocker could have been better designed though, because they are too flush with the rest of the spine.

Its 7-inch IPS display does very well in terms of colour reproduction. The reflections off the screen are tad lesser than on an iPad Mini. We tried reading a book in the evening sunlight outdoors, and while the Kindle's

Price
₹15,999

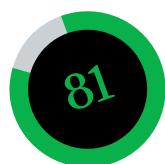

brightness was set at 20%, the iPad Mini's had to be bumped up to around 30% to read the same book. Marginal difference in terms of brightness levels, but a big difference in reading comfort.

The Kindle has a distinct advantage over rivals in text rendering, crispness and readability over the iPad Mini. However, the iPad Mini is pretty much at par in terms of video playback. But, for viewing photographs, the better colour richness offered by the IPS display on the Kindle gives it an advantage.

Battery life on the Fire HD is right up there with the Apple iPad Mini. We read the same page of the same book on both devices for 20 minutes, at 100% screen brightness. Both devices registered exactly 7% battery discharge in that time.

For ₹15,999, the Kindle Fire HD is a pleasure to use and comes with Amazon's ecosystem of apps, books and entertainment. *Get more out of this review by following instructions on page 108.*

Toshiba Canvio Connect 1TB

Offers enhanced portability

Price
₹6,000

Toshiba Canvio Connect quite portable as compared to previous generation Canvio drives. It also comes with 10GB of cloud storage. You can access the drive (provided your system is connected to the net) via the Pogoplug app on your mobile devices. The transfer speeds offered were quite impressive: Sequential Read / Write (MB/s): 118 / 115; Assorted Read / Write (MB/s): 99 / 54 and Intra-drive transfer speeds Sequential / Assorted (MB/s): 28 / 26. The drive is decently priced looking at its built-in backup and remote access utility, performance offered and cloud storage.

Lenovo S890

Average sub 20k phone

Price
₹19,800

The Lenovo S890 brings two unique features to the table. A nice cover which works like a smart cover i.e., the display goes off every time you close the flap and comes on when the flap is opened and a funky, appealing UI. Apart from this, it's an average, run-of-the-mill Android smartphone. It won't run all video formats natively but multi-tasks well. It offers smooth gaming and average battery. This is worth considering but there are better options available out there at similar price range. *Visit page 108 to get more out of this review.*
