

Google Maps for iOS update

Google Maps for iOS update brings a custom iPad interface along with improved navigation, live traffic updates and incident reports

Xbox One allows self-publishing

Microsoft says ability to self-publish games won't be available at Xbox One's launch but will be added during the console's first year in the market

Xolo Play T1000

A great budget gaming smartphone

Price
₹15,899

The Xolo Play is a great device if you want to play games on the go. Games such as Dead Trigger, Real Racing, Dead Space and more ran very smoothly. The graphics of the games too looked better than what we have seen on other budget smartphones priced around the 15k mark. It's built well, has a rubberized back, which adds to the grip. Its camera isn't great, though. The Android 4.1 OS isn't skinned but the smartphone runs on a custom ROM. The battery of the smartphone is good to last for a day of average use.

TP-LINK M5350

Great for 3G on-the-go

Price
₹8,999

The M5350 is a portable 3G Wi-Fi router. It sports a stylish cobble-stoned design that's unique and premium. Slip in a 3G-enabled SIM inside the M5350, plug in the device to a laptop via USB and you're online within seconds. Setting it up is a breeze. The device also acts as a Wi-Fi hotspot, allowing more PCs to share the 3G Internet. We hooked up three PCs and surfed the Web without a hitch. Since the connection is split and shared, browsing speed took a hit. We can't rate its throughput since 3G speeds aren't reliable, but this is a great device to have on the road, especially at an MOP of ₹5,500. *Flip to page 108 to do more with this review.*

ADATA SX910 512GB SSD

Size comes at a premium

Price
₹33,600

At 512GB, the ADATA XPG SX910 is the highest capacity SSD we have ever tested. It houses a SandForce SF2281 controller along with 16x Intel 32GB synchronous NAND memory. In terms of transfer speeds, it performs at par with the OCZ Vertex 4. Real-life Sequential Read/Write (MB/s): 348 / 311 and Assorted Read / Write (MB/s): 252 / 247. ATTO benchmark gave a score of 465MB/s and 540MB/s for write and read respectively. As far as Sandforce SF2281 controller based SSDs go, this is one of the better drives. At ₹33,600 the drive comes at a premium. Performance wise, it is good but lags behind the Samsung 840 Pro and OCZ Vector SSDs.

Amazon Kindle Paperwhite

The ideal e-book reader

Price:
₹10,999
(Wi-Fi only)

The Kindle Paperwhite is expensive for its price but if you are someone who reads a lot of books and doesn't care about tablet functionality, you can consider this device. It gives you the ability to carry 1,100 books and more wherever you go. There are cheaper e-book readers available in the market but the package deal on offer with the Kindle paperwhite may be more attractive to the avid reader. You have access to the Kindle Store in India and the device is comfortable for prolonged usage indoors as well as outdoors under sunlight. The battery life on the device is great too. Apart from ebooks, it syncs docs and PDFs as well.
