HTC Desire 500 coming soon

HTC has launched the Desire 500 in Taiwan. The smartphone runs on Android 4.2 Jelly Bean skinned with the HTC Sense 5 UI and shows off a 4.3-inch display.

LETTER OF THE MONTH

✉ I am a 17-year-old guy from Balichak and one of your thousands of fans. I know you'll read this because you're always thinking about your readers. I went through the letters regarding the June issue and saw few people complaining about this and that, and moreover they're really concerned about the packaging of the magazine. You know what I think? Some people may disagree but the packaging is great and I like it. If you know how to open it, you can do it without damaging the magazine so no need to go to the IIT chemistry lab in search of tapes. I've been reading Digit for a long time (first in the school library and then started buying it) and I know why you're Number 1. The new digital Skoar! was just cool. But please try to provide updated software in the DVD (JRE was old). Your reviews give great knowledge, and my favourite is the

Bazaar section. One request: If you could provide some reviews about anti-virus software, it would be really great. Otherwise you guys are really great and your hard work reflects in the magazine (I'm not talking about the glossy paper). The event coverages were really good and I had a great time watching them. After realizing my tech knowledge, my friends have also started buying the magazine. Keep it up and best wishes for your future. I love the whole Digit team; you transform normal people into geeks.

Soumya Chowdhuri

📧 Thank you for your feedback Soumya. We really appreciate you taking the time to drop us a line, we'll look at your suggestions seriously.

Robert

📧 No, not at all. Digit is made by 9.9 Media, and IC Chip is published by Network 18.

Your friend is probably referring to the 1998-2001 Chip that used to be published.

Jasubhai Digital Media bought the rights from Vogel (Germany) to use the Chip brand in 1998, and started publishing Chip Magazine in India. This contract extended until May 2001. From June 2001, Jasubhai Digital Media stopped publishing Chip, and started publishing Digit. It was just a name change, and the entire editorial staff remained the same. Jasubhai Digital Media was then bought over by 9.9 Media in 2007/8.

In December 2003, Infomedia bought the rights to publish Chip in India from Vogel, and started publishing "IC Chip".

Thus people might have some confusion about Digit and Chip, but the simple fact is: 1998-2001 Chip and 2001-Present Digit were like cousins, but 2003-Present IC Chip and Digit have no relation whatsoever.

I hope this clears up all doubts you and others have on the subject.

Robert

✉ I just bought the July issue of the magazine and found the Skoar! DVD to be slightly scratched and I don't know if anything can be done.

My views on the June issue:

1. I loved the title "Function(al) technology" of your column.
2. Swapnil Mathur's article on "Tomorrow's Imaging Technology" was really enlightening.
3. The word jumble in World View is good timepass but give the solutions.
4. The cover story was good, but didn't feel like an anniversary issue.
5. And lastly, just turn over to page 150. I don't know if you guys were really short of questions to which Mr. Steve Kaneko had answers to or was his liberty taken away from him?

My views on the July issue:

1. I was disappointed by the Skoar! DVD. It failed to run on my system.
2. Amazingly crafted cover by Mr. Jayan K Narayanan and Team.
3. The cover story this month actually was better than what I read in the June issue.

4. I understand that it's necessary but devoting 8 entire pages for the Intel XDK seems too much.

5. As usual, I loved Digit Diary.

I also have a lot of ideas concerning this year's CTC (5):

1. A clue which is actually a video you guys upload on YouTube with a QR image that leads to a huge loop. And the audio of the video being something special (Using Coagula Light and Sonic Visualizer/Audacity).
2. Try making the loop a big one, with something in the middle so that the players who think really hard might be able to get back in the game, instead of completing the loop and realizing that they've wasted their time.
3. Many twists and turns.

I think I'll end my letter now. I've attached my CTC IV spreadsheet for you to see. All hail Digit!

Mukul Kumar Yadav

📧 Send me your postal address. We'll send you a replacement DVD.

Regarding the June issue:

1. Thanks ;)
2. Will tell Swapnil
3. Is it really that hard? Waiting a month for the answers would be too long, and in the same issue people would just cheat and it'd be useless.
4. You can't win them all :(
5. We ask questions, and sometimes people cannot answer them. We're still going to print that we asked the question though, so you know what they don't want to talk about :)

July:

1. We'll send you a replacement
2. Will tell the Design Team
3. Thanks :) We do get it right once in a while.
4. The Intel advertorial is extra pages – usually the issue is 120 pages, but as long as Intel runs, 128. We'd never cut out edit pages for advertorial or ad content.
5. Thanks ;)

Maybe you can be a part of creating CTC - V this year, if you're willing to forgo the fun of playing it. Damn impressive spreadsheet, by the way.

Robert
