

Liquid Coolers

Brand	Corsair	Corsair	Cooler Master	Corsair	Corsair	Corsair	
Model	H55	H60	Seidon 120M	H80	H90	H80i	
Price (₹)	4,700	4,800	5,999	7,200	7,300	7,425	

Test Scores

Performance (Out of 70)	58.38	57.83	64.98	57.72	64.97	56.76	
Features and Accessories (Out of 20)	3.95	7.8	10.9	4.1	7.35	8.25	
Build Quality (Out of 10)	3.75	3.75	2.25	2.25	3.75	3.75	
Grand Total (Out of 100)	66.08	69.38	78.13	64.07	76.07	68.76	

Specifications

Intel CPU Socket LGA (775/1150/1155/1156/1366/2011)	(N/Y/Y/Y/Y/Y)	(Y/Y/Y/Y/Y/Y)	(Y/Y/Y/Y/Y/Y)	(Y/Y/Y/Y/Y/Y)	(N/Y/Y/Y/Y/Y)	(N/Y/Y/Y/Y/Y)	
AMD CPU Socket (AM2/AM2+/AM3/AM3+/FM1/FM2)	(Y/Y/Y/Y/Y/Y)	(Y/Y/Y/Y/Y/Y)	(Y/Y/Y/Y/Y/Y)	(Y/Y/Y/Y/N/N)	(Y/Y/Y/Y/Y/Y)	(Y/Y/Y/Y/Y/Y)	
Radiator Dimensions (in mm)	120 x 152 x 27	120 x 152 x 27	150.3 x 118 x 27	120 x 152 x 38	140 x 170 x 27	120 x 152 x 38	
Fan (Number/ diameter in mm)	1/120mm	1/120mm	1/120mm	2/120mm	1/140mm	2/120mm	
Fan Speed (in RPM)	1700	2000	2400	2500	1500	2700	

Features:

Cold Plate finishing	Glossy	Matte	Matte	Matte	Glossy	Matte	
PWM/Digital control/LED/Sheathed Cable	N/N/N/N	Y/N/N/N	Y/N/Y/Y	N/N/Y/N	Y/N/N/N	Y/Y/Y/N	
Optional fan space	1	1	1	0	1	0	
Number of steps taken to install	7	6	6	7	8	7	

Accessories

Screws/Fan Splitter/Vibration dampeners	N/N/N	N/N/N	N/N/N	N/N/N	N/N/N	N/Y/N	
Thermal Paste (Pre-applied/Extra) (Y/N)	(Y/N)	(Y/N)	(N/Y)	(Y/N)	(Y/N)	(Y/N)	

Build Quality

Tubing (Rubber/Plastic)	Rubber	Rubber	Plastic	Plastic	Rubber	Rubber	
-------------------------	--------	--------	---------	---------	--------	--------	--

Performance

Idle performance (temp in degree C)	33.25	33	30.25	31.5	30.5	30	
Load performance (temp in degree C)	52.92	54.25	49.5	50.1	49.4	52.9	
Noise Performance (by audibility)	Dull Hum	Dull Hum	Silent	Loud	Silent	Loud	

a waterblock, a radiator, a reservoir, tubes and fans. All of these parts are connected together in a closed loop and this makes up a water cooler.

In liquid coolers, heat emanating from the CPU is transferred to the liquid pumped by the pump through the waterblock, the liquid then flows through the tubes to a radiator which has fan(s) attached to it and this allows the heat to be pushed out of the system. You can also make your own CPU liquid cooler, but unfortunately, parts for making it are not easily available in our country and you need a ton of money to procure them as

well. Worry not as our market is flooded by LC (Low Cost) all-in-one liquid coolers from many manufacturers and the best part about them is that they require zero maintenance and come completely assembled out of the box. Some of them landed in our comparison test and a few from amongst them are really worth considering for your moderate to high-end CPU overclocking demands as well.

Some of these coolers have big radiators, so make sure that your cabinet has space to mount them before buying. The H55 from Corsair was the cheapest and the most basic

liquid cooler in our test and the Corsair H60, its bigger brother is only ₹100 costlier than the H55. But the surprising part with H55's performance is that it beats the H60 by more than 2°C on full load. Only the features and accessories aspect improves H60's overall score over the H55

The Cooler Master Seidon 120M is CM's in-house designed liquid cooler unlike some other coolers which are designed by Asetek or CoolIT. The Seidon 120M has a medium width radiator with a single 120mm fan and sheathed cable. At ₹5,999 it is a great cooler to consider if you

want much better performance than the Corsair H55 and H60. The next cooler from Corsair, the H80 has a button on its pump to control the fan RPM. The radiator on H80 is a lot thicker than the H55 and the H60 and comes with two fans for a push pull configuration. The H80 was trumped by the others because even though its temperatures were in control, the fans on H80 at full load were annoyingly loud.

We also received the newer version of the H80 that is H80i and of the older H100 that is H100i. The "i" moniker at the end of H80i and H100i signifies Corsair's new LINK digital
