Indie-pendence

The high, the lows and the promises of life as an indie developer

Nikhil Pradhan

Nikhil.Pradhan@thinkdigit.com

With the explosive growth of smartphones and tablets, app development is no longer a hobby but a viable career choice. We speak to four promising independent developers, who've all witnessed varying amounts of success, about what it means to be an indie developer and what people looking to join the ranks should know.

The line-up:

Sreekanth Sastry

Sreekanth, a Bangalore resident, is a software professional with a history of working with startups and established companies. He has now started Antara-jaal, a company developing vernacular lifestyle mobile apps for iOS and Android. He is behind 'Situational Gita', an app that recently broke into the Top 10 paid apps list on the Indian iTunes App Store.

Nirmit Gauravbhai Kavaia

Nirmit, a 22 year old resident of Rajkot, has been working on and developing apps for Windows Phone and Windows for three years. He has so far published close to twenty apps, out of which Ludo, a free app for Windows 8 has been downloaded by over 50,000 users in nine months.

Raja & Shanthi

Raja and Shanthi are a husband-wife duo from Chennai who used to work in the

VFX industry but now have their own company- WapleStuff- that publishes apps for iOS. Their first app, Pick- The Purchase Tracker, has been downloaded by over 1,14,000 iOS users across the world and was also featured by Apple in the 'Apps for Shopping' and 'Shopping Assistants' sections in the US App Store.

Rahul Mathur

The youngest of the lot at 21 years, Rahul develops for Windows Phone and is cur-

rently interning with the Walt Disney Company in Mumbai. He is responsible for the WP app, Instant Access that has been downloaded over 20,000 times.

Now that you're familiar with them, here's what they had to say about life as an indie developer:

On choosing to become an indie developer

Sreekanth, Raja and Shanthi said their decision was based on their excitement at the potential of mobile apps and how they were connecting with users at a personal level and changing lives at the ground level on a day to day basis.

Nirmit and Rahul were more pragmatic with Nirmit looking at earning some money and strengthening his resume by developing apps. Rahul came from a coding background and then joined the Microsoft Student Partner program, following which he realised that the WP App Store was anemic and decided to make apps for it.

On picking the ecosystems to develop for

Sreekanth started developing first for iOS because of its simplicity and ease of testing. However, he soon recognised
