abooks. Open the lid, and the clean keyboard deck comes as a secondary point of attraction, the first being the surprisingly generous sized touchpad! On the keyboard, each key are slightly smaller than usual, but not uncomfortably so. The spacing is well managed within the real estate available. But the best part is the excellent travel and sharp key response while typing. The shift, enter and backspace keys have not been messed around with, leaving them with the traditional placement and size

we are accustomed to. Tips the scales at 1.4kg, with almost the same dimensions as the TouchSmart 11.

Text rendering is quite good. Even on a smaller than usual display, we found that reading text from the same source was actually not at all any less comfortable than on a bigger 13.3-inch display. Colour richness is quite good, and the black levels were surprisingly among the highest when compared between laptops in this category. It attracts fingerprints on

the screen, which can be clearly seen till you wipe them off.

For a machine powered by the Core i3 processor, the

Acer Aspire V5-471

F202e's performance is pretty much in line with the other machines with similar processors. When used as a primary machine in office, we had Chrome with multiple tabs, multiple Microsoft Word documents and Excel spreadsheets and iTunes streaming music in the background, and the performance was fairly good. Battery life on the VivoBook F202E was clocked at 148 minutes in the battery benchmark test. This machine was our instant recommendation, till the HP
