Significant rise in malware targeting online banking, online snooping by cyber agencies and other stories.

Blackhole sun

The supermassive black hole at the center of the Milky Way Galaxy will soon consume a blob of gas and begin to radiate energy at a tremendous rate.

Sony Xperia Z1

display. It runs Android 4.2 Jelly Bean OS and is powered by 2.2GHz Qualcomm MSM8974 quad-core processor along with 2GB of RAM. The Xperia Z1 has 16GB built-in storage and supports additional storage of up to 64GB via microSD. The smartphone comes with a 3,000mAh battery.

The Xperia Z1 comes with the company's 'G Lens' with a 27mm wide angle and bright f2.0 aperture, a custom-made large 1/2.3-type Exmor RS CMOS image sensor for the phone with 20.7MP and a BIONZ engine for mobile image processing.

In terms of connectivity, the Xperia Z1 supports 3G, Bluetooth 4.0, USB 2.0, Wi-Fi and Wi-Fi Hotspot functionality, and NFC. Sony is offering free access to movies, songs and TV shows (under the Sony Music, Sony Entertainment and Sony Pictures brands) with the new smartphone.

Sony is offering 8GB of data free on Vodafone, free accidental insurance for six months and EMI schemes with the Xperia Z1.

The company also introduced its QX10 and the QX100 'lens style' cameras, which are priced at ₹12,990 and ₹24,990, respectively. The Sony QX10 sports an 18.2MP resolution while the QX100 has a 20.2MP resolution.

Sony has also launched the SmartWatch 2 in India that comes with the ability to handle phone calls (dial, answer, reject), send a command to the smartphone to take a photo, control presentations using the Presentation Pal app, control media playback on the phone and even read email when not connected to the phone.

Samsung launches Galaxy Note III for ₹50k

The ₹49,990 Samsung Galaxy Note III has a 5.7-inch Super AMOLED display with 1920 x 1080 pixels resolution. It's powered by Exynos Octa 5420 processor coupled with 3GB of

Samsung Galaxy Note III

RAM and runs on the Android 4.3 Jelly Bean OS. It has 32GB built-in storage expandable via microSD card slot, a 13MP rear camera with BSI sensor and LED flash as well as a 2MP front camera for video calling.

The Samsung Galaxy Note III offers Wi-Fi, NFC, Bluetooth 4.0 and GPS with GLONASS support. It comes with Gesture, Accelerometer, Gyroscope, Proximity and Hall Sensors. The Note 3 has a plastic body with a leather-like back cover for a premium finish. The Android device comes with the multi-functional stylus. Samsung is offering the Galaxy Note III with special EMI schemes during the festival season.

The Samsung Galaxy Gear Smartwatch that we reported on last month is compatible with Galaxy Note 3 (as well as Note 10.1). It has a 1.63-inch Super AMOLED screen, 512 MB RAM, 4GB built-in storage and a 1.9 MP camera. It can make/receive calls and will show notifications from social media apps. Samsung says support for other Galaxy devices, including the Galaxy S4, will be added soon.

BlackBerry launches the Z30

BlackBerry has introduced its latest flagship smartphone, called the BlackBerry Z30. Successor to the full touch Z10, the new BlackBerry smartphone runs v10.2 of the BB 10 OS and is powered by a dual-core 1.7GHz Snapdragon S4 Pro along with 2GB of RAM. The BlackBerry Z30 sports a 5-inch Super AMOLED display with 1280x720 pixels resolution and 295ppi. The smartphone comes with 16GB built-in storage and has an option to augment that via microSD.

The Z30 has a 2MP front facing camera capable of

recording 720p video and an 8MP rear camera with an f2.2 lens capable of shooting video in 1080p.

The BlackBerry 10.2 update brings a new Priority Hub feature, which allows users to manage all their conversations and notifications in one place. It also includes improvements to the audio of BBM Voice and BBM Video chats.

BlackBerry Z30

In terms of connectivity, the Z30 will support 4G LTE, dual-band Wi-Fi a/b/g/n, Bluetooth 4.0 and NFC. The BlackBerry Z30 smartphone includes a 2,880mAh battery, which the company says is the largest battery ever built into a BlackBerry smartphone.

With the launch of flagship smartphones, consumers are spoilt for choice – be it Android powered devices, iOS devices or even the dying BlackBerry. With the launch of the smartwatch as an accessory, you now have access to a secondary display to perform basic functions without removing the phone from your pocket. **4**
