generation)

our continuous video playback, it lasted for nearly 10 hours and that is very good. Overall, for the price you pay, the package on offer is quite brilliant.

Best performer:

When we ran the 3D mark Ice Storm benchmark on the

OS, multimedia or gaming, this is the tablet for you. It has a great battery life as well.

Even though the device isn't officially available in India, you can purchase it from online shopping portals. The device will come with global warranty as well.

bilities, a smooth touchscreen and the ability to run all the apps from the Google Play store. The device has a compact form factor along with a good display.

Winners

There are just nine tablets around the ₹20,000 price point that participated in this shootout and a few of the tablets disappointed us considering the specifications they offer were quite good but the real world usage wasn't. What we noticed was that specifications such as Quad-core processor and 2GB RAM seems like a dream on paper, but the real world use was a different story entirely. Nonetheless, there are those tablets that stood out when compared to the rest.

PLEASE NOTE

The Nexus 7, second-generation tablet isn't officially available in India yet. We acquired the tablet through our personal sources. The device can be purchased through online portals such as ebay. It supports global warranty. Since the tablet is the epitome of what an Android tablet should be, especially around the Rs. 20,000 price point, we thought it essential to include the device in this shootout.

Nexus 7 (Second Generation), the result said maxed out. We have not seen such a result on any other tablet that we have tested and that is saying something. If you want the best performing tablet be in terms of raw performance, smooth

unadulterated Android experience on the tablet is smooth. The biggest plus point is that the tablet will be the first to receive the Android OS updates. It performed very well in our tests too showcasing good multitasking capa-

Editors Pick:

The only con with the iBerry Auxus Core X4 3G tablet is that the calling capabilities of the tablet and are underwhelming. Ever since we installed the Android 4.2 update on the tablet we like the package on offer. The device still lags and stutters, but this is very less when compared to the competition. All the apps work on the tablet and the touchscreen response is good. If you want a large screen tablet and do not want to cross the ₹20,000 threshold, you should consider this device.

Best Value:

For its price point, the first generation Nexus 7 is the best, especially if you are on a budget. The raw
