HOW EVIL IS TOO EVIL?

Video-game violence is, like all onscreen violence, an act of play. But the medium has a unique capacity to inveigle, and even implicate, its audience through its interactivity. Now that we've seen mandatory playable acts of torture in GTA V, New Yorker tries to answer the inevitable question of how evil should a video game allow you to be?

GET PAID TO STAY IN BED FOR 70 DAYS

In a quintessential first world scenario, NASA is currently looking to pay a number of volunteers \$18,000 to lie in bed for 70 days. But even here there's competition. They don't want just any couch potato. There's a physical test to qualify. Follow the link to apply:

SEX AND POLITICS AT GOOGLE

Behind the banalities of every coding at Google, there's apparently a lot of instances of employees engaged in acts of non-computational parallel processing, if you know what we mean. This story from Business Insider gives you the inside scoop on the darker side of Google.

APPLE IPHONE 5S REVIEW

As with everything else, The Verge seems to have gotten hold of the iPhone 5S before most people. In this extensive review, David Pierce tries to find out if the best iPhone ever, really is a better phone? <http://dgit.in/wwiphone5s>

Apple iPhone 5C review

Well, as long as you're reading the 5S review above, you might as well check out what The Verge thinks of the iPhone 5C. "It is less a new product than it is a vibrant reminder that Apple has the best marketing team in the business," says Nilay Patel.
