The reason for the frustrations of the Windows developer community is Microsoft's decision to hold back the RTM (Release to Manufacturing) build of Windows 8.1, the latest update to the latest version of Microsoft's operating system, from developers and shipping it only to hardware manufacturers. In the past, RTM builds of Windows were released to developers and MSDN sub-

Microsoft has said that it expects to make updates to Windows 8.1 right till the final version is released to the public and claimed that be the reason for keeping the RTM build away from developers, since it was not the final build. Developers have shot back with complaints that they will be unable to test their apps and software to make sure they work properly when installed on the final version of Windows

However, developers have responded by pointing out the flaws in the Windows 8.1 Preview that was released on June 26, including performance issues that have yet to be fixed. >
