Agent001: Assisting hapless readers since 2001

Join the indefatigable Agent001 as he assists our hapless readers with their myriad purchase decisions. Need a gaming laptop? What about a new phone? Why not a tablet? Can I downgrade? All these and more, answered.

Which gaming laptop?

I'm a big fan of Digit and because of it have become the go to man for any advice on buying gadgets in my circle. But currently I am myself confused and need your advice.

I want to buy a gaming laptop & my budget is around 40,000 (probably under). I wish to play some high-end games like : Metro (1 & 2), Battlefield 3 & 4, Crysis 3, Dark Souls 2 etc..

And I should also be able to do few other things like watching HD movies, listening to music, video chatting, MS-Office, Adobe Photoshop, Browsing etc..

I know that I am asking too much but I do want to play these games and can't increase my budget anymore.

I have shortlisted following laptops but am not able to choose which of it is the best.

- 1) HP Pavilion G6-2312AX Laptop { APU Quad Core A10/ 4GB/ 1TB/Win8/ 512 MB AMD Radeon HD 7660G (Integrated) and DDR3 2 GB ATI Mobility Radeon 7670M HD Graphics (Dedicated) }
- 2) Lenovo Essential G505s (59-380146) Laptop { APU Quad Core A10/ 8GB/ 1TB/ DOS/ 512 MB AMD Radeon HD 8650G (Integrated) and GDDR3 2 GB ATI Sunpro HD 8570 Graphics (Dedicated) }
- 3) Lenovo Essential G500s (59-388254) Laptop { 3rd Gen Ci5/ 8GB/ 1TB/DOS/

DDR3 2 GB NVIDIA GeForce GT 720M (Dedicated) }

- 4) HP Pavilion G6-2313AX Laptop { APU Quad Core A10/ 6GB/1TB/ DOS/ 2.5GB Graphics (same as the G6-2312AX) }

Which one should I take? Is there any other better option in my budget in the market ? I am ready to wait till Diwali (November) if any better option is coming (of course in my budget).

Vinit Kumar

Among the options that you have selected, we would recommend the third option, the Lenovo Essential G500s (59-388254) Laptop (3rd Gen Core i5/ 8GB/ 1TB/DOS/ DDR3 2GB NVIDIA GeForce GT 720M (Dedicated)). The prime reason for this selection is that while AMD APU's are extremely good when it comes to offering battery life, they tend to feel slightly sluggish when taxed. Which is why, the Intel Core i5 with a 1GB graphics card would be a better bet for your gaming requirements.

Trouble choosing a tablet

Dear Sir,

Greetings. Please advise on the best tablet to buy among the following:

- WickedLeak Wammy Desire 2, ₹9,490

- Asus Google Nexus 7 (2012) 32GB (WiFi), ₹14,999
- iBall Slide Q9703, ₹15,000
- Zync 9.7, ₹14,000
- Spice Stellar Pad mi-1010, ₹9,000

Chanak Doshi

From the list of options that you have shared, the Nexus 7 is undoubtedly the best. It has a good display, powerful hardware and the best part is that it will be the first to receive Android updates. the only downside is that there is no expandable storage. Compared to the other tablets on offer, the Nexus 7 will run all the apps from the Play store very smoothly and will be great for multitasking and multimedia consumption as well.

Is this a good phone to buy?

My current phone, the Nokia 2690 is almost dead and now I want to switch over to a
