

"Nice Tumblr" customization extension

Missing E will add a whole new set

Change the look and feel

Bored of your blogs looking the same? Are Tumblr themes not enough? If these questions are something that have been both-

ering you then the Nice Tumblr chrome extension is for you. It gives you the power to change the look of Tumblr by allowing you to set different themes available on Nice Tumbler and also

allows you to use custom CSS. To do this Go to chrome.google.com/webstore and download the Nice Tumblr extension for your browser. Once installed, the Nice Tumblr icon will appear in the dashboard on the top right hand side. Click the Tumblr icon to access the Nice Tumblr menu. From here, you can change the background, select a custom theme or better yet, use custom CSS. As simple as that.

Pimp your tumblr dashboard

Missing E is available for Chrome, Firefox and Safari. It allows you to apply extremely useful tweaks to the dashboard, posts and also has some social tweaks. You can replace Dashboard controls with icons, add mass delete button to your Drafts, Queue and published posts, show number of notes when hovering your mouse over posts in the Mass Editor, etc. The Widescreen Dashboard tweak is worth checking out too. Go to missing-e.com/download to download the extension. The website automatically identifies your browser and gives you a download link. Once you are on the extension's control dashboard, tweak to your heart's content. The best part is that you can export and

import your settings and it works like a charm.

Dim sponsored posts

X Kit is another browser extension that boasts a number of tweaks and is available for Chrome, Safari, Firefox and Opera (Yay!). It has plenty of tweaks to enhance your experience from stopping GIFs on dashboard to making links open in new tabs. The best feature though is the 'dim sponsored posts on dashboard' tweak. To get started go to xkit.info/seven/download to download the extension. After it installs, it will automatically show the X Kit control on Tumblr as a modal box. The X Kit button can be seen beside the settings button of the dashboard.
