

Interview with
Magnus "Gordon"
Gardebäck,
Co-founder and Technical
Lead, Simogo

Who's got the game at the NASSCOM Game Developers Conference 2013?

Our third straight year at NASSCOM Game Developers Conference – where the crème de la crème of Indian gaming gather annually – and we've only seen it go from strength to strength. Here's some of the major highlights of the event held in Pune last month.

This year's NGDC had over a thousand industry professionals participating, not to mention gaming luminaries not just from every corner of the country but all around the world, signalling towards the maturity of the gaming industry in India. Mr. Rajeev Vaishnav, Vice President, Member Outreach, NASSCOM, and Rajesh Rao, Chair, NASSCOM Gaming Forum, also took the opportu-

nity to inaugurate and release a booklet on relevant laws and policies governing the space of social and casual gaming in India – they did this in the presence of a representative from the State Government of Maharashtra, which was a major sponsor of this year's event. Good tidings, eh?

Apart from the usual mingling between gaming professionals and peers, this year's NGDC also had a lot of stalls from companies and studios that were presenting on stage – the likes of BlackBerry, Microsoft, Autodesk, Amazon, etc. The Oculus Rift was also spotted here, and not surprisingly attendants made a bee-line at its stall. The show had a very good mix of local and

international speakers bringing their insights from the world of gaming. There were four hands-on workshops on topics like PR, game design, and legal advice.

For the first time, NASSCOM Gaming Forum Awards was held at this year's show, with the Indie Game of the Year bagging a cash prize of ₹1,00,000 and the Student Game of the Year receiving a cool ₹50,000.

Who won? Yellow Monkey Studios' HUEBRIX won both the Game of the Year and Indie Game of the Year awards, while Chaos Theory by Diptoman Mukherjee bagged the Student Game of the Year award.

If you're a game developer, this is a great annual event to meet like-minded people and industry heads. >
