

Mr. Dutt goes to America

It's his son's 20th wedding anniversary. He has got a DIGISOL NAS for his daughter-in-law, who runs a graphic design studio out there. Since she travels so much, the product solves the problem of accessing her files, through the cloud storage feature. Her vast collection of designs, documents and images can all be stored safely and securely on the 8 TB storage, which can sync her data automatically as well.
