

The vFileServe application

vSceneViewer and vFileServe

vSceneViewer is a tool used to visualize geometry ranging from a shape to a scene outside the vForge tool. It can be used in Windows* and Android* platforms and works on the exported versions of these files. It can be opened from **All Programs > Havok Project Anarchy > Tools > vSceneViewer** on Windows*. Once launched, you will be able to choose the files to be loaded and will show you the shape or scene accordingly.

On Android*, vSceneViewer works with the help of the vFileServer application, which runs on the computer to receive the required components via streaming. So, the vSceneViewer app basically, connects via WiFi to the vFileServe application thus avoids having to generate a new apk every time something is changed. In order to set it up on your Android* device, you will have to deploy an install on the connected device by going to **All Programs > Havok Project Anarchy > Tools > Android* > Scene Viewer**. Once it has been deployed, you will need to set the connection parameters for your PC i.e. its IP Address. This can be done from the vFileServe application itself, by clicking the "prepare devices" button in the top right of the application.

Launching the scene viewer app on the mobile will now give you a list of scenes available and once you click on one of them, you will be able to see it stream to your device!

There are a lot of similar tools available that are integrated with the vForge tool and you will

be able to easily navigate them with the help of the extensive and detailed documentation available for each of them. There is also a lot of courseware available online on the Project Anarchy website, which you can refer to in case you are just getting started with this tool.

THE MOBILE DEV CHALLENGE

Project Anarchy recently launched the Mobile dev challenges with some very attractive rewards in an attempt to get developers started with development on the Project

PARTICIPATION IN THE MOBILE DEV CHALLENGE BY PROJECT ANARCHY HAS SOME INTERESTING ADVANTAGES. APART FROM THE PRIZE MONEY THERE IS A CHANCE TO GET FEEDBACK FOR YOUR GAMES FROM THE TEAM ON HOW TO IMPROVE THEIR GAME.

Anarchy game engine. Moreover there is a chance of receiving feedback for improvement for all developers who give in their submissions before February 1, 2014. All developers who submit their entries before this date will receive feedback from the team on how to improve their game before final submission deadline. Eventually ten finalists will be selected to showcase their game on the Havok's booth at the GDC to be held in March.

Eligibility

Following are the eligibility criteria for this game dev challenge: -

- Adults above 18 years of age
- Residents of countries mentioned in the Official Rules on the website. This includes Indian residents.
- All teams will be required to appoint a team leader or representative to speak on their behalf.
- Restrictions mentioned in the Official Rules will be applicable. This includes restriction to employees, judges and their immediate family members etc.

Submission Requirements

- The game must be in English or have an English translation available.
- The game must be agreeable to the Project Anarchy end user license agreement.
- The game must be submitted before the early or final submission deadline i.e. February 1, 2014 (Early Submission) or May 31, 2014 (final submission deadline).
- The game must have been published to an official app store like the Play Store, so the time taken to get the game approved and published there must be taken into consideration. The link to the game on the app store will need to be provided and in case of paid games, a promotional code needs to be given, otherwise such games can be also be submitted to the SFTP site, whose details can be gained by requesting a login at contest@projectanarchy.com.
- At least 4 images and videos of less than 2 minutes need to be submitted along with the entry.
- A text description explaining the game's functionality and features also needs to be provided.

Prizes

Grand Prize

- \$100,000
