

Nexus wireless charger

Charging was never easier. Well, assuming you have the supported Nexus, that is. Read more if you do: <http://dgit.in/taiqui>

Pre-Biblical Wine

The world's oldest and largest wine cellar was unearthed recently, in Israel. And it pre-dates Jesus. Read on: <http://dgit.in/agedvin>

Amkette Trubeats Metal

A good smartphone accessory, with acceptable music playback

It is not surprising that portable bluetooth speakers are becoming fairly popular, off late. Done well, most can be a good add-on for your smartphone, doubling up for music playback via Bluetooth and also as a speakerphone when work calls. Amkette's Trubeats Metal is one such speaker.

As far as form factors go, the Trubeats Metal speaker ticks all the right boxes. The rounded design makes it look even more compact. The build quality is all metal, essentially the metal alloy drum, with the black coloured base and the status LED strip above that. Weighs just over 300 grams, and Amkette packs in a good quality carry case as well. The speaker itself

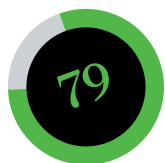

Price
₹2,995

has Bluetooth and AUX connectivity via 3.5mm headphone jack. Bluetooth connectivity is still the best way to use this.

The Trubeats Metal speaker works extremely well as a speaker for your phone calls, be it in a room during a small conference call or in a car when you have to take an urgent call. The clarity of the spoken word is very good. Having said that, this little device's music playback is a bit of a mixed bag, with Trubeats Metal doing very well in terms of clarity and vocals, but bass is largely missing. Quite expected, because this isn't aimed at anyone who likes bass heavy music. Also there are physical restrictions given its diminutive size and design. Amkette claims that the integrated battery can last for 8 hours on a single charge, and we actually got 8 hours and 11 minutes with the iPod Touch connected via bluetooth. All in all, a rather neat phone accessory to have, which is fairly flexible in terms of use.

Plantronics ML2 Bluetooth headset

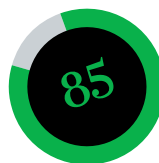

An affordable headset that feels premium

Price
₹1,199

This device looks simple and conventional, and it has just one do-it-all key that lets you switch the ML2 on or off, and also receive calls, as well as handle voice commands. Its gel ear tip is extremely comfortable.

The ML2 can pair with two phones simultaneously. While on a call, the headset suppresses background noise better than others. Ditto with its voice calling performance. Plantronics claims that the battery life of the ML2 is 6 hours, but we got 5 hours. Overall, a very good device at an affordable price.

ASUS R9 270X Direct Cooling Top Edition 2GB

For when the 280X is a bit out of budget

Price
₹15,000

Think about a lower powered, smaller sized, cheaper R9-280X and you've got yourself a R9-270X! This card is cheaper by ₹7k and while it does take a performance hit by a proportional margin it does manage to play a heck lot of the games at a comfortable FPS. What we don't see is any compromise on the build quality. For its price you do get a better card in terms of the HD7870.

Performance.....	66
Value	90
Build	62

Specifications

Bus standard: PCI Express 3.0; **Base clock:** 1050 MHz; **Boost clock:** 1120 MHz; **Memory clock:** 5600 MHz (1400 MHz DDR5); **Memory:** 2048 MB GDDR5, CrossFireX support; **Stream processors:** 1280; **Connectivity ports:** HDMI, DVI-D, DVI-I, DP; **DirectX Support:** 11.2; **OpenGL Support:** 4.3; **Power Connectors:** 6 Pin x2; **TDP:** Approx 210 W; **Fans:** 2 x 100 mm; **Warranty:** 3 years
