Music Downloader

Published by Paolo Basilicata, Music Downloader is an app exclusive to Windows Phones. Available for ₹70, the app lets you download songs and music directly from your smartphone. You can also watch YouTube

Poweramp

videos and then download the audio. It provides an option to link songs to each of your contacts to serve as customisable ringtones.

There's also the ability to create playlists and play your music directly from the app or let it play in the background with its background playlist feature. The background picture for each playlist/song is customisable making it easy to identify.

Music Downloader allows you to stream the song online and listen to it before going ahead and downloading it. It uses SoundCloud as its source to allow users to download music freely and legally.
