

WINDOWS 10

Following the tradition Microsoft unveiled the next version of its Windows operating system. Called as “Windows 10”, it’s something Microsoft should have released two years back. The technical preview is already release and if you’ve had your hands on it here are some tips and tricks that you should definitely try.

Resize Start menu

In Windows 10 Microsoft brought the very anticipated feature – the ‘Start Menu’ back. The new Start Menu has a revamped design with the touch of the Metro UI as well. One unique Start Menu feature that never existed in the previous versions was the ability to resize it.

In Windows 10 you can now resize the Start Menu by dragging the top edge upwards and downwards.

Change Start Menu colour

Start Menu that replaced the Start Screen can now be customized as well. You can change the default Start Menu colors to stylize your desktop.

To change the color open the Start Menu > Right-click on any empty space > Personalize > Choose your color.

Add recycle bin on the taskbar

Until today the Recycle Bin could never get its place on the

{ Tips & Tricks has its own page numbers, and does not follow the rest of the magazine's page numbers. This is done to ensure that you can cut out and save T&T in a separate folder for later reference. }

Taskbar. However, with Windows 10 Microsoft has made it possible for you to add the Recycle Bin icon to it. This makes it easy to access it quickly.

To place the Recycle Bin on the Start Menu first you need to place it on the Start Screen (like you did in Windows 8) > right-click on the icon > click on ‘Pin to taskbar’.

Hotkeys in Command Prompt

The Command Prompt was always deprived of the keyboard shortcuts; the PowerShell within it hasn’t had much love (by non-geeks) in the last several years because of it. Here are some of the best and very handy hotkeys you should know.

- To select text use: SHIFT + LEFT ARROW / RIGHT ARROW
- To select all: CTRL + A
- To copy: CTRL + C
- To paste: CTRL + V
- To enable Mark mode: CTRL + M (lets you use mouse for selection)
- To enable history navigation: CTRL + UP ARROW
- To find in console dialogue: CTRL + F
- To close command prompt: ALT + F4

Learn the new keyboard shortcuts

With glut of new features comes new shortcuts. The multiple desktops, task view and others can be accessed with a simple keyboard shortcut. Here are some of the important keyboard shortcuts for the keyboard junkies.

- Snapping window: WIN + LEFT or RIGHT (can be used with UP or DOWN to get into quadrants)
- Task view: WIN + TAB – New Task view opens up and stays open.
- Create new virtual desktop: WIN + CTRL + D

- Close current virtual desktop: WIN + CTRL + F4
- Switch virtual desktop: WIN + CTRL + LEFT or RIGHT

Disable Start Menu and enable Start Screen

Seriously Microsoft? Do you really think anyone would like to go back to Start Screen when they have the “Start Menu”?

In case if you are an exception among the Windows users and want the Start Screen back, Microsoft lets you do it in a single click.

To do it, right-click on the Taskbar > Properties > Start Menu tab > Uncheck “Use the Start menu instead of the Start screen”.

Check “Use the Start menu instead of the Start screen” to get back the Start menu.

Make Start menu look like Windows 7

Clubbing the features of the two major predecessors, Windows 10 brings live tiles into the Start Menu. However, if it’s not your cup of tea you can stick to the old-fashioned Start menu as well.

To do it, firstly you’ll need to unpin all the tiles from the Start menu, which will make it minimal. Secondly, pin the tiles that you want for quick access. Do it by switching to the “All apps” view > right click on the app > Pin to Start. Lastly, you can also change the color of the Start

Pin the Recycle bin from the Start Screen to add it to Taskbar.
