

The law may hold

According to reports, Intel thinks that the Moore's law will continue holding true even beyond 10nm chips. http://dgit.in/More_Moore

Data that dazzles

Although we do our best to make this magazine captivating to our audience, its medium isn't without its limitations. Sometimes words just aren't enough to capture someone's imagination. After all, humans are visual animals, stimulated more by something we see than by reading its description. And in these four pages, we try to capture interesting stats and data points that will dazzle you with appealing stats. Charts, interactive infographics, or any other visual representation technique, the art of presenting mind-bending amounts of data that's readily apparent is beautiful. See it for yourself.
