Xiaomi Mi 4i

Good value, not for power users

The Xiaomi Mi 4i is the company's second phone in the ₹10,000 – ₹15,000 price bracket. The first being the immensely popular Xiaomi Mi3, with which the Xiaomi made its debut in India. The Xiaomi Mi 4i betters the Mi3 in almost all aspects except one, and that might just be its Achilles heel, especially if you expect the Xiaomi Mi 4i to be as fast and fluid as the Xiaomi Mi3 (more on this later). Also, the onboard 16GB storage with no MicroSD card slot might just be a deal breaker for many.

Design and Build Quality: With the Mi 4i, Xiaomi has achieved and almost perfected the art of creating a 5-inch smartphone which is compact, slim, lightweight and yet, manages to pack a large battery. At 130 grams, the phone feels super-light and offers a snug fit, thanks to the slim 7.8mm profile and matte finish plastic back, the Mi 4i feels secure and well made. If I was to pick one area where the Xiaomi Mi 4i sort of drops the ball in terms of design and finishing, it would have to be the power and volume rocker buttons. The chrome finish
