

Say bow!

Nikon has developed a camera mount for dogs that tracks the dog's heart rate and snaps a picture accordingly. More here: <http://dgit.in/1Aaxlh4>

Crazy Car

Have to 30k to spare? This car is up for sale. <http://dgit.in/1HpXXx4>

It can take some good images under optimal light conditions (sunlight), but fails in almost all other conditions.

As mentioned above, the Moto E's camera is dismal, but it's not alone. The Yu Yuphoria is also weak in this department, along with both

BATTERY

You would have noticed that we've not talked much about the BlackBerry Z3 till now. That's because the device doesn't quite match up to the other devices in the performance or camera departments. Battery life is a different story though. On our tests, most of the other smartphones can go on for seven hours at best, while the BlackBerry Z3 can hold its own for over 12 hours.

You would think this is the best possible battery life amongst these devices right? Well, think again. The BlackBerry Z3 was outperformed by the Asus Zenfone 2, which took the test for a solid 16 hours. Yes, even we were surprised to find an Intel processor perform so well on this test.

The Xiaomi Mi4i also showed prowess in the battery department, although it couldn't outperform the Zenfone 2 or BlackBerry Z3. The device lasted about 8 hours on the test. In

the Karbonn smartphones. The Yuhphoria tends to overexpose images under sunlight, while indoors, we often got washed out pictures.
