

Daniel Wellington switch case for the Apple Watch

Do you think your Apple Watch looks...too plain? Or too classless? Or God forbid, poor?! If so, we have found the perfect product for you.

The Switch Case that comes with an FKM Rubber Strap specifically designed for the Apple Watch, is a case cum strap for the Apple Watch designed by Daniel Wellington to not only protect your precious Apple Watch, but to also make it more classy and better looking in general.

The main case is made of CNC processed Stainless Steel which provides an amazing amount of protection to the watch which already has the ceramic shield screen

known for its scratch resistance and strength. The strap attached to the case is made of industry grade FKM known for its hi-tech properties, high-quality surface finish, texture, and weight. The case also comes equipped with a quick release mechanism for interchangeable straps that Daniel Wellington offers in

their lineup including but not limited to their chain lineup, the leather strap lineup, and many more to come in the future. The case is guaranteed to be compatible with the Apple Watch Series 4, 5, 6, and the recently launched SE versions of the Watch as well, with both, the 40 mm versions and the 44 mm versions. This case will set you back about INR 14,000 depending on the time you buy it at but let's be honest, you'll buy it whenever you want to.

HiFiMAN Shangri-La Headphones

This one is for the true music lovers out there who want to listen to music the way it was supposed to be heard - with ridiculously expensive gear. The HiFiMAN Shangri-La headphones are one such specimen and boy will you enjoy using them.

The Shangri-La aren't just a pair of headphones however. They come with a large amplifier without which the headphones wouldn't work. Essentially meaning that you won't be able to use these headphones on the go unless you plan on carrying the amplifier everywhere.

The amplifier boasts the finest 300B tubes for the crisp sound quality that the headphones provide as well as 23 separate resistors for the 24 different sound levels so the difference between each sound level is clear as day.

Apart from that, the HiFiMAN headphones also boast a diaphragm thinner than a single strand of hair with a nanoparticle coating.

The HiFiMAN Shangri-La Headphones are one of a kind and are sure to catch your attention. Especially if you've got the moolah to afford them. Peak performance doesn't come cheap after all.

By this time you must be wondering how much do these actually cost and well, this particular pair of headphones by HiFiMAN will set you back about ₹36 Lakh for the entire set. A steep price to pay for pure aural bliss.

Caviar custom iPhone 14 Pro Max Daytona

How do you tell someone you're rich without actually telling them you're rich? Do you wear a Rolex? Or do you pull out one of the most expensive flagship phones out there from your pocket? We were thinking about these questions when we came across Caviar's latest addition to their already insane lineup - The Limited Edition Daytona series, which comes with a Rolex Cosmograph Daytona Watch (Ref: 116518LN - 0078) embedded in the back.

Staying on the theme of the legendary racetrack of Daytona, Caviar also added three dashboard dials of cars namely the speedometer, the oil indicator, and the fuel indicator. The

phone also has three switches in the back which are fully functional in terms of your ability to flip them but do not serve a purpose.

And of course, in true Caviar fashion, you also get to choose the amount of storage you wish to have in your phone which seems like a cruel joke to play on Caviar's customers because we all know, if you were to drop over \$100,000 in cash for a phone, you'd go for no less than the 1 TB version of this iconic limited edition phone.

Coming down to pricing, the 1 TB Caviar Custom iPhone 14 Pro Max Daytona will set you back by \$134,000 for one of the 3 units in existence so if you wish to get your hands on one of these, make sure you do it soon!
