Hey Boo-Man,

I never laughed like this ever before after reading an article so funny but brutally honest. I agree with every word you chose here and it's amazing how you kept me engaged all throughout without me bursting a nerve in my head. Cheers!

—Shivansh

It is funny that you find my disgruntled opinions hilarious. But I for do not find them funny, and I am currently fuming.

—Boo-Man

Hi Shivansh, Boo-Man is in a sour mood now because everyone keeps hogging his spot to test Digit Zero1 devices. Apologies for his very Boo-Man nature. Thanks for writing in!

—Sativk

Letter of the Month

I finally got around to reading the Nov issue. Whew, that cover meant business. I was delighted to see Digit plunge into AI coverage with that massive cover story. However, I have some well-intentioned critiques. However, there are much better choices than Chase, like Martin Ford and Max Tegmark. They have a much better grasp of the subject and work closely with the leading scientists in the field at the forefront of innovation. Quoting from his wiki article: "His interest in AI stems from his reading of science fiction, which he describes as philosophy in fancy dress." Getting ideas of how AI works from science fiction is probably not the best source. However,

this is a reasonable intro to the layman. My estimate for AGI capability is the early 2030s. Anyway, I've written enough! Looking forward to seeing more coverage about this magical topic of alien intelligence that is not of human origins! Thank you for making Digit awesome!

—Jeevan Raj

Thanks for your harsh but honest critique of the AI cover story. We've already forwarded a summary of your thoughts to Calum Chace, and will keep you posted. All of us here at Digit will keep trying to bring relevant industry takes and putting the spotlight on important developments in this space.

—Jayesh

digit diary

If you are ever curious about what the **Digit gang is up to**, this is the place to get all the inside info. From the **latest game we're obsessing about** to the newest intern we're driving up the wall – it's all here folks.

Sativk's one InDesign file away from becoming a Luddite. Dhriti's rattling benchmark scores in her sleep. Mithun's sworn to never touch an excel sheet again. Robert is rumoured to have fallen asleep in a video call and had a nightmare about falling asleep at a video call. Ali's now in a long-term relationship with our Sony A7S III. Prakrit's dealing with very persistent B-Roll eye floaters. Manish needs another three limbs to keep up with his benchmark speed. And there's a Jayesh-shaped hole in the office wall. We shall drop an update when he resurfaces. So that's another Zero1 under our belt. So we live to publish another issue. Other than our prestigious awards, the team's had little time for anything else. We had a few new interns around the office; two of them from Dhriti and Prakrit's alma mater. To Mithun's surprise, they seemed quite enthusiastic, and more importantly, quite efficient. Oh, Satvik attended Diljit Dosanjh live in concert ("Who?" –Ali) and has been humming punjabi songs when left to his own devices. Dhriti took a break from our Amazon lives for a few weeks, which led to some fairly interesting shenanigans as our troop of headless chickens took centre stage. The teams are congregating at Noida soon to meet the powers-that-be. Manish plans to slyly introduce them to D&D. More on that if he pulls it off. If not... we'll never mention it again.

QUOTE OF THE MONTH

"One's too much, two's not enough"

— Satvik on a Friday evening
