

The budget smartphone category in India is the most competitive out there. Budget phones these days have come a long way. Smartphones under ₹20,000 these days offer similar performance chops as some of the most premium offerings a few years ago. With more youngsters and students venturing into mobile gaming, performance is something that a lot of users look for in the budget segment. One smartphone in this segment stood out in the all important aspect for Digit Zero1 – performance.

Winner: **Moto G82**

The Moto G82 emerged as the Digit Zero1 winner in our budget smartphone category. Powered by Qualcomm's Snapdragon 695 5G chipset, the Moto G82 offers linear performance, a vibrant 10-bit display, and a clean, bloatware-free software experience. The Moto G82 outperformed the competition in our stringent performance and battery tests. In our tests, this phone's display

also came out to be the brightest display in the Budget category. Apart from the powerful chip and a high quality display, the Moto G82 also stood out in terms of software, as it offered the cleanest Android experience with the close-to-stock MyUX Android skin. There aren't any unnecessary tweaks to Android, making it a clear winner.

Runner-up and Best Buy: **Redmi Note 11 Pro+ 5G**

This year's runner-up for the Budget Smartphone category is also our

winner of the Best Buy Award. The Redmi Note 11 Pro+ 5G's overall balance of performance, display, and build and design, all with the affordable price tag makes the smartphone our Best Buy for 2022. The Redmi Note 11 Pro+ 5G is powered by a Snapdragon 695 chipset which comes with two performance cores and six efficiency cores. The Redmi Note 11 Pro+ also has a display that is right up there with the winner. It is a 6.67-inch FHD+ AMOLED display with a 120Hz refresh rate and a claimed peak brightness of 1200 nits. The Redmi Note 11 Pro+ 5G, however, falls short in few areas like the software experience; one of the reasons it loses out to the Moto G82. Nevertheless, the Redmi Note series has once again proved that there is a reason why the smartphone is so popular in the budget segment.

2nd Runner-up: **Poco X4 Pro**

The Poco X4 Pro was the third-best smartphone in our budget category. The Poco X4 Pro wasn't too far away from the top two products in the category in terms of pure performance figures. The smartphone's display also gave one of the best results during our tests, second to only the winner, the Moto G82. With the 6nm Qualcomm Snapdragon 695 chipset, the Poco X4 Pro was a promising performer in our tests. The smartphone comes with a super AMOLED display with 120Hz refresh rate. While in performance the Poco smartphone stood tall, the smartphone lacked behind slightly in terms of the complete software experience.
