

In some places in India, pollution is a big problem faced by the people, and having an air purifier is becoming more and more necessary with each passing day. With the state of things in mind, Digit has resurrected the Best Air Purifier category for our Digit Zero1 Awards. For our best Air Purifier category, we have taken several factors into account, including the difference an air purifier makes in the air quality, how much area an air purifier cover, features, design and ergonomics, and the price at which all of this is offered.

Winner and Best Buy: **acerpure Cool C2 AC551-50W**

Acer's acerpure Cool C2 2-in-1 Air Purifier and Air Circulator is the winner of the Digit Zero1 and Best Buy awards. The acerpure Cool comes with a 4-in-1 HEPA 13 filter that is claimed to eliminate 99 per cent of airborne bacteria, 99.97 per cent dust, and other contaminants. It showed the highest drop in the Air Quality Index (AQI). The device has a proper fan on the top, which rotates at 90-degree angles, helping it achieve one of the best air circulations.

It is rather basic in terms of design. There is a handy remote control, which sticks to the back magnetically. The device can also be controlled via the acerpure Life app, which is available for both Android and iOS users. The acerpure Cool 2-in-1 is basic, but does the job well. In the best buy category this year, the competition was a bit lopsided. Apart from winning the Zero1 Award, acerpure Cool C2 2-in-1 Air Purifier and Air Circulator is also the winner of the Best Buy Award for its excellent performance and features it packs.

Runner-up: **Dyson Purifier Cool Formaldehyde TP09**

Dyson, one of the most sought-after air purifiers brands out there, came second with its new

Dyson Purifier Cool Formaldehyde TP09
Price: ₹41,990

O2 Cure Hulk
Price: ₹28,499

DIGIT BEST BUY WINNER-2022

acerpure Cool C2 AC551-50W
Price: ₹12,990

Best Air Purifier

Solution for pollution

acerpure Cool C2 AC551-50W
Price: ₹12,990

TP09 Purifier. The Dyson TP09 Air Purifier is equipped with a HEPA H13 filter and carbon filters that are claimed to capture dust, gasses, and other ultra-fine pollutants. Like the acerpure Cool 2-in-1, the Dyson also showed an impressive drop in AQI, and it achieved one of the highest Clean Air Delivery Rates. Despite being a solid product, the Dyson TP09 fell short in a few parameters, securing the second spot in our award for the best air purifiers.

Second Runner-up: **O2 Cure Hulk**

The O2 Cure Hulk, which emerged the second runner-up in our air purifiers category. It is also a humidifier, and comes with a 7-layer filtration system. Apart from the carbon and HEPA filters, the O2 Cure Hulk also comes with activated carbon, humidifier, a cold catalyst filter, and anion filters. The O2 Cure Hulk offers the most stringent filtration system in all of the contenders for this year's award. However, the air purifier loses out in terms of power consumption, and the airflow with the only outlet being the top-mounted fans.
