

Despite the growing popularity of truly wireless headphones, wireless on-ear or over-ear headphones continue to be ubiquitous gadgets that cannot really be replaced. The soundstage and isolation of these headphones are still far superior to that of in-ear headphones. This year, we saw improvements in Active Noise Cancellation, better accompanying apps with more customisation options, AI-based sound and noise cancellation modes, and much more. Due to the sheer number of options in the market, it can be daunting to single out the absolute best wireless headphones; however, that's exactly why Digit Zero1 exists. Read on to find out which wireless headphones snagged the 2022 Digit Zero1 Award this year!

Winner: Sony WH-1000XM5

The Sony WH-1000XM5 is the undisputed winner of the Digit Zero1 Award for the best performing wire-

Sennheiser Momentum 4 Wireless

Price: ₹34,990

less headphones. They are the best noise-cancelling cans in the business, without a doubt. Equipped with the V1 processor and eight onboard microphones, the Mark 4s cancel almost all frequencies of ambient noise with ease. As for the sound quality, Sony has incorporated DSEE Extreme yet again which upscales compressed files to near hi-res quality. The device also comes with LDAC support that allows streaming of music at higher bitrates

than the conventional SBC codec. With LDAC active and DSEE Extreme toggled on, the sound quality is extremely dynamic, detailed, and full-bodied. There's a slight bass bias but it isn't muddy in any way. The microphones work in conjunction with an AI noise rejection algorithm for fantastic call quality and the battery life is decent as well, lasting over 30 hours with noise cancellation turned on. Overall, these are an exemplary pair of headphones that are truly deserving of this award.

Runner-up: Sennheiser Momentum 4 Wireless

Equipped with aptX HD and aptX Adaptive codec support, the Sennheiser Momentum 4 Wireless is a fantastic pair of wireless headphones. The headphones have class-leading battery life and last a whopping 52 hours with aptX and ANC turned on. While the Active Noise Cancellation doesn't outperform the Sony WH-1000XM5, the Sennheiser Momentum 4 Wireless is still capable enough of cancelling most low-frequency, constant sounds. The sound profile of these headphones is fantastic, and close to neutral.

Best Buy: Blaupunkt BH-51 ANC

Priced at merely ₹2,999, the Blaupunkt BH-51 ANC is a value-for-money pair of wireless headphones with ANC support. The sound quality of these headphones is good as well; the bass response is quite punchy, the mids are slightly underemphasised, and the highs are sufficiently detailed. You also get 32 hours of battery life and fast charging support.
