

Nestling smack between the budget and premium truly wireless earphones categories, the mid-range TWS segment has grown by leaps and bounds. Unfortunately though, it is the one TWS segment that saw the least action in 2022. Most of the TWS launches oscillated between the premium and budget segment. This was slightly disappointing. Nevertheless, what we got this year still gave us the right mix of performance and value. Let's find out who took home these titles.

Winner: Sony WF-C500

The Sony WF-C500 is Sony's most inexpensive TWS yet, priced at ₹5,990. The earphones come packing 5.8 mm drivers and support the SBC and AAC codecs. They also sport Sony's DSEE (Digital Sound Enhancement Engine) technology. Turn this on, and you will hear a significant enough difference when playing lossy files. This, coupled with Sony's prowess in sound tuning, results in a pretty balanced sound

profile. The bass response is slightly boosted, but it never enters the region of muddiness or boominess. The mids are surprisingly close to neutral, resulting in a detailed representation of vocals and lead instruments. The highs see a significant boost, meaning elements such as cymbals and hi-hats are more present in the mix. Additionally, you can even use the Sony app to EQ these earphones. The battery life is also solid at this price point, and the mic does a good job indoors, making the Sony WF-C500 a deserving winner!

DIGIT BEST BUY WINNER-2022

JBL Tune 230NC
Price: ₹5,999

Runner-up: Philips TAT4506BK

In all honesty, the Philips TAT4506BK pleasantly surprised us with its close-to-neutral sound signature and pristine representation of the highs. The bass sounds wonderfully controlled and rich, the highs are well-produced, but the mids aren't as pristine as the WF-C500. They also come with ANC which is absent on the Sony WF-C500, however, it only does enough to subdue some ambient sound. However, the sound quality is surprisingly balanced and detailed and the battery life is quite stellar as well. Overall, we would be more than comfortable recommending the Philips TAT4506BK to anyone looking for a balanced-sounding pair of headphones under ₹10K.

Best Buy: JBL Tune 230NC

If you're looking for a feature-rich and reliable pair of truly wireless earphones under ₹6K, the JBL Tune 230NC is a solid option. The earphones come equipped with pretty solid ANC. It has fantastic battery life spanning over 40 hours in total! There's also an accompanying app with customisable EQ support, so you can tweak the sound as you like. The earphones have a bass-boosted sound signature that bass lovers will enjoy. Despite the obvious bass bias, the lows don't sound dark or muddy and the mid-range is actually quite well-produced. Good sound, excellent battery life, and an array of features is why the JBL Tune 230NC confidently wins the Best Buy Award!
