

GEEK CULTURE IS OUR WAY OF LIFE, AND ENCOMPASSES MOVIES, GAMES, COMICS, AND TRENDS FROM ACROSS THE GLOBE

THIS MONTH IN CULT:

We have Boo-Man looking back at the tech launches from 2022, and giving his two cents on those. Also, find out more about the science fiction films that never made it to the theatres.

Motocompacto reporting for duty?

Japanese car manufacturer, Honda, has filed a trademark for a tiny electric scooter known as Motorcompacto. The trademark filing has a fair amount of similarities with Honda's Motocompo, an offering in the 1980s that was designed to fit inside the trunk of a car.

WHAT'S NEW

Enter the metaverse with your smartphone!

Sony has announced its latest offering - a set of wearable motion trackers that can be connected to one's smartphone to navigate their way through the metaverse. These trackers will help you move your avatar as you make your way through a new, digital landscape. The product is known as Sony Mocopi, and it includes six sets of trackers that are worn around the ankles, wrists, hips and hands. These puck-shaped wearables detect motion as and when you move, thereby making your Avator move too.

Meta has already sold around 14 Million VR headsets and is investing in developing AR and

VR technology further. Meta believes that VR headsets will replace

the need for smartphones in the future, and the idea does sound rather intriguing. The Sony Mocopi is believed to be priced at ₹29,222 and may be available for users in January next year. However, the launch date has not been confirmed as of now.

Play more

Back in the day, if you could defeat the computer at chess, you'd feel like a king for a day. Now, we've got a modern equivalent of 'beating the computer' and that is possibly playing with AI. OpenAI, artificial intelligence research, and deployment company has announced that it's trained a bot to play Minecraft. How did it achieve this? Well, the same way we all learn things - by

watching 70,000 hours of Youtube videos.

Gamers FTW!

It's a great time to be a gamer in India, here and now. Not just to play games but to earn a living through them, too. It's a fact underscored by HP India Gaming Landscape Study 2022, a study that surveyed over 2000 people across 14 Indian cities.

Muted sub-Reddits

Reddit has finally added the feature that would let users mute sub-Reddits. This feature had first been teased in Reddit posts after the user blocking feature was introduced. It will help users curate their feeds better and to their taste without leaving sub-Reddits.
