

THIS IS TECHNOLOGY, CULTURE AND SCIENCE WITH A DIFFERENCE, AND THAT DIFFERENCE IS USUALLY ENOUGH TO MAKE MOST NORMAL PEOPLE GO "WTF?"

This month in ALT:

We look at the prospect of digital immortality, and answer all the frequently asked questions about CBDC, e-Rupee and UPI. We also bring to you some of the best memes from 2022, so you end the year with a smile!

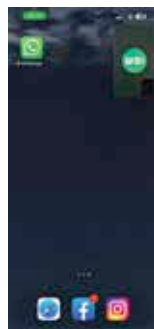

Samsung and other devices vulnerable after a major security leak

An Android security leak recently led to the development of trusted malware apps that allow hackers to gain access to the entire Android OS. The leak has left Samsung, Xiaomi, LG, and other Android smartphones vulnerable to this malware and the subsequent hacking. <https://digit.in/sam>

WHAT'S NEW

WhatsApp video calls get picture-in-picture mode

This new WhatsApp update could make the video calling experience on the app even better. As per WABetaInfo, a new WhatsApp beta update submitted through TestFlight on iOS reveals the release of picture-in-picture mode for video calls on the instant messaging service. For the unversed picture-in-picture, shortly called PiP mode would let the user minimize the video call screen to a small floating window. You could drag the WhatsApp PiP window across the screen and drop it anywhere you like. From the screenshot shared by WABetaInfo, we learn that the PiP window can be accessed from the phone homescreen and other

places outside WhatsApp. WhatsApp for iOS version 22.24.0.79 is the one that brings this feature. So, if you are part of the TestFlight beta Program, you can check for this update, you may get the feature. Since the feature is in the early stages of testing, it may appear to more users in a phased manner and the beta testers who get it may

come across some teething troubles. Not to mention, the feature should be showing up on Android phones also. <https://digit.in/WAVc>

Vi ₹2,999 plan offers 850GB

Vodafone Idea (Vi) unveiled a new premium plan for prepaid users, applicable all over India. The plan is priced at ₹2,999 and offers data, SMS, calls, and a few other benefits. Vi had also introduced new plans around Diwali, with their prices being ₹1,449, ₹2,899, and ₹3,099. The new plan is available on the official website. Vi's new

plan has a validity period of 365 days and offers 850GB of data. Users will also get 100 SMSs per day. Furthermore, to sweeten the deal, Vi is also

offering a few benefits along with this plan, such as access to Vi TV Shows and Vi Movies. Users can enjoy access to premium films, news, live TV, original content, and more on the app. The plan is also offering its Binge All Night benefits. These features come with no extra cost or pack reduction of any kind. <https://digit.in/VImore>

How are Bluetooth devices being hacked?

Do you often leave your smartphone Bluetooth in discovery mode? Well, then, you might be susceptible to hackers who may be using a method known as Bluebugging to record data from your device with you not knowing anything. <https://digit.in/BluBug>

Neuralink all set for human trials in 6 months

During the company's latest event, CEO Elon Musk stated that Neuralink will be ready for human trials in about 6 months. "We think probably in about six months, we should be able to have a Neuralink installed in a human," said Musk. <https://digit.in/neulin>

DigiYatra app: revolutionised air travel?

The Government of India has launched a new app known as DigiYatra, which aims to offer a seamless process for all air passengers at the airport. As of now, the app works at airports in Delhi, Varanasi, and Bangalore. <https://digit.in/digitrav>
