

Samsung drops a new foldable device in the market

During the Consumer Electronics Show (CES) 2023 held in Las Vegas on Wednesday, Samsung revealed a new prototype device known as the Flex Hybrid. This device brings two new cutting-edge technologies as it folds and slides too. Dubbed a smart mobile device, it has a display on the left as well as one more screen space on the right that slides outward. Samsung Display has

announced that the device is basically a prototype for future laptops however, they have not offered any

information on the peak brightness or resolution. The Flex Hybrid is the name given to the concept prototype for future laptops. It has a folding technology applied to the left side of the screen, with the slideable technology being on the right. The smaller 10.5-inch display has an aspect ratio of 4:3 while the larger 12.4-inch display has a ratio of 16:10.

Lenovo unveils its dual-screen Yoga Book 9i

Lenovo at CES this year, taking the showfloor by storm, announced its two dual-screen laptops. One of these is the Lenovo ThinkBook Plus Twist, while the other is a more consumer-focussed model known as the Yoga Book 9i. <https://digit.in/roundround>

HTC announces a new VR headset, the Vive XR Elite

HTC is ready to take preorders for the upcoming Vive XR Elite, which is a virtual and augmented reality headset. This headset has been designed to compete with Meta's Quest headsets along with the Apple AR/VR device. <https://digit.in/HTCL>

LG's Signature OLED TV

LG announced new Signature OLED M that breaks the mould. The Signature OLED M has a "Zero Connect" box that sends video and audio signals to the TV. This box only needs to be placed up to 30 feet away from the TV itself for it to work. This makes it the "world's first wireless OLED TV." <https://digit.in/LGTV>

JBL unveils the JBL Spinner BT

JBL announced its first Bluetooth turntable that comes with aptX HD wireless streaming during the CES 2023 event. It has orange accents on an all-black design along with an analog output. The product is known as the JBL Spinner BT.

WHAT IS IT?

The JBL Spinner BT is a Bluetooth turntable that can stream vinyl records to other wireless soundbars, speakers, and headphones with 24-bit hi-res quality, as long as they are compatible. The turntable comes with a built-in switchable moving magnet photo stage that can be

used with active speakers. It can also be used to feed into a traditional audio system along with an external photo preamp. The turntable has a belt drive. It has an MDF plinth with damped feet that is claimed to lead to effective vibration modulation. It

also has an aluminium platter. The forearm of the turntable is equipped with an audio technical moving magnet cartridge. The speed options are locked with a speed sensor so that the device delivers the right pitch that is needed.

WHEN WILL THE BL SPINNER BT LAUNCH?

It is believed that the JBL Spinner BT will launch in Q3 2023. It may be priced at \$399 (which is around ₹32,827.19, making it more affordable than the aptX HD-equipped turntables that are currently available in the market.
