

Sennheiser Momentum 4 Wireless

Sublime sound coupled with classy looks

We reviewed the Sennheiser Momentum 3 Wireless in 2019, and now, three years later, we've finally got its successor – the Sennheiser Momentum 4 Wireless. If you take a peek at our Momentum 3 Wireless review, it will become apparent that we weren't impressed with those headphones. We assume Sennheiser went back to the drawing board for the Momentum 4 Wireless – and during our testing, we found that the company ironed out most of the issues we faced with these headphones' predecessors last time around. Let's find out how these headphones fared.

BUILD AND COMFORT

The Sennheiser Momentum 4 Wireless has gone through a radical design overhaul. Demure to a fault, Sennheiser has gone down the minimalist route with these abandoning the metal headband and large branding present on its predecessor. However, we believe this design iteration looks classier than ever before.

Some of the only design flourishes are present on the headband – these include the fabric-covered headband and the subtle 'S' Sennheiser logo. The memory foam padding with leatherette covering is extremely comfortable over long periods of usage. The headband has some soft padding underneath as well and distributes the pressure across your crown evenly enough.

The ear cups swivel to sit flat in the case or around your neck, but they don't fold. The headphones weigh a mere 293 g, which is a good 10 g lighter than the predecessor despite having improved battery capacity.

FEATURES

The Sennheiser Smart Control app gives users access to a fair number of features and customisation options. There's no customisable controls option but the app does come with a custom three-

band EQ. You can tweak the sound of these headphones as per your taste, although we would have preferred a 5-band EQ as many competitors offer. Sennheiser has also added a couple of new features with the new-generation Momentum headphones including Adaptive Noise Cancellation and Transparency Mode, Sound Check, and Sound Zones.

The app aside, the Sennheiser Momentum 4 Wireless comes with a couple of other useful features such as multipoint connectivity (to connect to two devices simultaneously), Voice Assistant access, and Automatic Power Off. However, it is missing an IP rating, which would have given users extra peace of mind.

PERFORMANCE

Packed with 42 mm dynamic drivers, the Sennheiser Momentum 4 Wireless sound absolutely exquisite. The headphones support Bluetooth v5.2 and a variety of audio codecs including SBC, AAC, aptX, and aptX adaptive. Unlike the Sennheiser Momentum 3 Wireless which disappointed us with

its uncannily bloated bass response, the Momentum 4 Wireless comes with a balanced sound profile laden with intricacies and detail. The sound profile is very close to neutral with only a very slight emphasis on the bass response. The vocals are exquisitely produced with good timbre. Lead instruments shine in the mix and sound extremely detailed. The highs are sparkly without a hint of being tinny, something that Sennheiser has always excelled at doing. Moving on to Active Noise Cancellation, the Momentum 4 Wireless doesn't outperform the Sony WH-1000XM5 but it is still capable enough of cancelling most low-frequency, constant sounds.

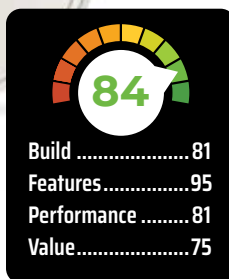

BATTERY LIFE

We can say with ease that the Sennheiser Momentum 4 Wireless has the absolute best battery life we've tested on a pair of noise-cancelling headphones to date. It comes with a whopping 60 hours of rated playtime with ANC turned on, which is seriously impressive.

VERDICT

The Sennheiser Momentum 4 Wireless gets the basics spot on – you get exquisite, balanced sound and ludicrous battery life that puts the competition to shame. Couple that with good ANC performance, a classy design, fast charging, and app support, and you've got yourselves a darn good pair of headphones worthy of being called a flagship in 2022. However, there are a few areas where the Sennheiser Momentum 4 Wireless still lags behind the competition such as quality of ANC, and the lack of IP rating.

–Dhriti Datta

SPECIFICATIONS

Headphones type: Circumaural (over-ear) | Bluetooth version: v5.2 | Codecs: SBC, AAC, aptX, aptX adaptive | Speaker type: Dynamic | Speaker size: 42 mm | Frequency range: 6 Hz to 22 kHz | Speaker sensitivity: 106 dB SPL (1 kHz / 0 dB FS) | Microphones: 2 MEMS microphones per side | Battery life: 60 hours (ANC on) | Charging time: 2 hours for full charge; 5 min for 4 hours
