How to restart your phone without the power button?

Starting or powering down your smartphone can be incredibly frustrating when the power button has broken. Fortunately, there are a few easy hacks

that you can implement in order to restart the phone without the power button. Keep reading to know all the different ways that you can turn to in order to reboot the phone without the power button.

Is the Android power button not working? Here's how to restart! The following are a few ways you can restart your smartphone without the power button:

PLUG THE PHONE INTO THE CHARGER

If you forget to check your battery status quite often and end up with a dead phone, this tip can help you

restart your Android phone without a power button. All you need to do is plug it into the charger and let the battery charge up. The phone will eventually power itself on.

ENTER RECOVERY MODE AND REBOOT THE PHONE

If you need to restart a phone without a power button, this method can help you. All you need to do is open the boot menu on the smartphone. To do so, either press the Home + Volume Up button or the Home + Volume Down button (different phones have different button combinations). Once the boot menu opens up, you just
