OnePlus 11R render looks a lot like the current OnePlus flagship

OnePlus 11R renders may give you déjà vu as it resembles the OP 11. The similarity in its camera housing is the reason for this. The images come from Ice Universe who refers to the device as OnePlus Ace 2, the codename for OnePlus 11R. <https://dgit.in/Op11>

WHAT'S NEW?

Apple's Reality Pro VR headset should launch sometime in spring

According to Bloomberg's Mark Gurman, Apple's highly-anticipated augmented and virtual reality headset is nearing completion. The company is expected to reveal the device in the spring, ahead of its WWDC conference. To indicate that the launch is imminent, Apple has shared the headset with selected software developers and provided them with a

preview of the new "xrOS" software. Gurman predicts that after the Spring announcement of "Reality Pro", the

device will be made available for purchase in the fall. However, the final stages of development for the device will affect the rest of Apple's 2023 product lineup. According to Bloomberg's Mark Gurman, the next versions of iOS and macOS will have fewer major changes than previously planned, as software engineers have been reassigned to work on the xrOS team.
