2023

has just started
and the amount
of launches

one-after-the-other are setting the tone
around what's to come in the smart-

phone market. In January alone, we
have seen launches across categories
from various brands like Xiaomi,
Realme, Tecno, Infinix, iQoo, and more,
with the OnePlus 11 and Samsung's

Galaxy S23 series coming in the first week of February. Luckily, the first month of 2023 has already given us one of the hottest head-to-head in the budget segment for the year – Redmi Note 12 5G vs Realme 10 Pro 5G. While each segment demands equal attention, in a market like India, the budget segment is arguably the hottest. With 5G starting to roll out to almost all Airtel and Jio users (sorry Vi), there is a new demand for budget-centric 5G smartphones.

While the Realme 10 Pro 5G came in December 2022, it is Realme's big bet in the budget 5G segment for this year. However, the Realme 10 Pro 5G faced tough competition the moment we flipped our calendars. The phone we are talking about here is the Redmi Note 12 5G, which comes from a family of highly-successful budget smartphones in India. Does the Realme 10 Pro 5G, with its striking design and 108-megapixel cameras have the ability to take on the Redmi Note 12 5G that comes from a lineage of successful budget phones? Let's find out.

Design

Starting with one of the most subjective elements of all, design. The design on the Redmi Note 12 5G is very basic, in-line with the company's design language for the Redmi Note series. There is a rectangular camera module on the top left corner of the polycarbonate back panel. The colour we have on our person is a shade of olive green, which looks quite classy. There is Redmi branding in the bottom left corner, and the back panel curves around the edges. Up front, the Redmi Note 12 5G has a basic hole-punch display. The bezels are slim at just about 2 mm, but the chin on the smartphone is 5 mm, which makes it rather thick as compared to some other smartphones of today.

The Realme 10 Pro 5G, on the other hand, takes a completely different
