

KILLER RIGS

Be it retro or be it M.E.T.R.O., we've got a gaming PC for your budgets!

The age-old question pitting Intel against AMD has led to many flame wars on Internet forums. So this month, we're bringing your two great builds configured to last for three years while churning out a lot of frames in AAA video games. Why? Because we want to watch the world burn... that's why.

Decent 3-year plan!

If you're looking to build a PC that will easily last you three years without any issues then this would be it. We're pairing a great current gen Core i5 processor with a really good graphics card that has DLSS and ray-tracing features! You can easily make this last more than three years!

Best VFM Gaming Processors

Are you wondering which processor gives you the best bang for buck? We've got you covered! And I don't mean like how CLAPTRAP has you covered on the world of Pandora. Nope, we do a better job!

Another 3-Year Plan!

Yes, we know. You might be wondering why do we have two builds aimed at gaming for the next three years, well the simple answer is one of them happens to be centred around an Intel processor and the other is around an AMD processor. Oh yeah, this one also has DDR5.

Gaming GPUs Under 1 Lakh

With GPU prices normalising, gamers thought they could relax! The prices have dropped but not to the level we were expecting them to.
