The Indian gaming sector has seen notable growth in recent years owing to increased penetration of accessible internet and affordable smartphones. The rising interest toward gaming, accompanied by improved infrastructure has also contributed to the growth of eSports as a serious profession. A recent report by Mobile Premier League (MPL), titled *India Mobile Gaming Report 2022* has revealed Uttar Pradesh as the top gaming destination in the country. Let's find out the factors behind this and also the other leading gaming states in India.

Top Gaming Destinations In India

Uttar Pradesh, Maharashtra, Rajasthan, Bihar and West Bengal have ranked as the top five gaming states in the country, as per the aforementioned MPL report.

Well, as MPL chief Namratha Swamy notes, these places have an increased number of gamers by virtue of "enhanced internet penetration and the availability of safe eSports and gaming platforms".

For instance, Bihar owes its title to the popularity of mobile gaming, especially in its capital city, Patna.

The report goes on to reveal the leading gaming districts in UP and they are Lucknow, Kanpur, Varanasi, Ghaziabad and Allahabad. It seems that these comprise up to 36 per cent of total gamers from the state.

Last year, we learned that the UP government is planning a formal policy for the AVGC (animation, visual effects, gaming and comics) industry. Initiatives such as this 'AVGC Task Force' can fuel growth even further.

Something else that caught our attention is that gaming in Tier 2 and 3 cities in India has seen impressive growth. They have even outpaced Delhi, Mumbai, Bengaluru, and other metropolitan cities.

Although not winning the numbers game, states like Odisha, Punjab, Tamil Nadu, Puducherry and Himachal Pradesh have seen the most year-on-year increase in mobile gamers. What's also interesting is the games that are most popular in India.
