

users to push the OMEN 17 to its maximum limits.

A OMEN 17 is powered with preinstalled Software: OMEN gaming hub which is ONE STOP SHOP FOR CUSTOMIZATION & PERSONALIZATION. It offers features targeted to improve gameplay & performance. Few Examples: OMEN optimizer-Booster helps Boost your performance, and easily disable unnecessary services while gaming. With the Performance control feature user can Control performance with “Balanced” & “Performance” modes with thermal fan control. With the Graphics switcher, users can easily switch between “Hybrid” and “Discrete” options. The new ECO mode is chosen for low power and heat setup. Best use-case is when running the notebook on battery. With Light studio, gamers can Coordinate color schemes, and easily sync lighting effects across their OMEN devices.

Q The press release mentions the HP OMEN 17 being targeted at professional gamers, can you give us some more information on how the HP OMEN 17 appeals to professional gamers? What kind of features and technology has HP baked in, keeping in mind professional gamers?

A Professional gamers need a device built with the best technology that delivers exceptional performance coupled with powerful graphics. The all-new OMEN 17 boasts the NVIDIA GeForce RTX 4080 Laptop GPU, which features the ultra-efficient NVIDIA Ada Lovelace architecture and AI-powered DLSS 3 for stunning graphics and life-like virtual worlds with full ray tracing. This supports Max TGP (Total Graphic Power) upto 175W in performance / GPU stress mode*. The device also comes with a dynamic processor, the 13th Gen Intel Core, that distributes performance to where it's most needed, allowing for better multitasking and increased productivity for gamers. With a 17.3-inch screen and up to a QHD (Quad HD) 240hz display[1], the powerful OMEN 17 provides an immersive experience

for gamers. The OMEN Gaming Hub is another notable feature of the device. It's a one-stop shop for all things gaming-related, from software enhancements to hardware control and live services, making it easy and simple for gamers to elevate their experience. The device also features Wi-Fi 6E technology, which provides faster speeds, improved performance, greater capacity, and lower latencies compared to earlier iterations. The HP Wide Vision 720p HD camera with temporal noise reduction and integrated dual array digital microphones ensures an exceptional audio and visual experience for gamers.

Q Do you see the premium tech and design used in the HP OMEN series trickle down to the HP Victus and Pavilion gaming series laptops as well?

A At HP, we strongly believe in making our technological innovations accessible across all devices, regardless of their price point. Our aim is to mainstream technology, making it available to a wider range of users. In the past, we have successfully implemented this principle with our premium range of consumer products.

We understand that even entry-level gamers require high-performing devices to enjoy a seamless gaming experience. Therefore, we have incorporated some of the advanced technology from our OMEN laptops, such as the superior thermal cooling system, into our entry-level gaming products as well. This allows us to provide a similar level of quality and performance to users across all price points. Moving forward, we are committed to incorporating more such technological innovations into our products, ensuring that all users can benefit from the latest advancements in technology.

Q How does HP see the overall PC gaming scenario evolve in India? What role does HP OMEN as a brand play when it comes to esports and professional gaming in India?

A The past few years have seen an acceleration of gaming across the world, especially in India. In fact, India is all set to emerge as the top 3 PC gaming countries in the world. Post-pandemic, the laptop segment quickly became an all-in-one solution for those who had to study, work, play, or do all those things in an affordable single device. The rise of laptops can be attributed to not just more gamers, but also more use-cases for gaming machines. India has emerged as a roughly 1 million + Gaming notebook market, witnessing a growth of over 2000% in the last 5 years.

At HP, we understand that gaming is no longer specific to a certain segment of the audience. No matter what type of gamer – professional, enthusiast, mainstream - HP has the gaming solution for everyone. Today's professional gamers need the right experience and technology to get the most out of gaming. Innovative thermal technology and winning horsepower, stunning visuals supported with great accessories bring games to life by enhancing the overall experience. Based on this user insight, HP engineered its gaming ecosystem with OMEN laptops and desktops range that not only caters to professional gamers but also lets them get more immersed, involved, and improve their level of play.

Q What next can we expect from the HP OMEN series when it comes to innovation and performance leadership in the gaming arena?

A In 2023, we can expect more breakthroughs in the Indian gaming community, which allows for more innovations to meet the growing demands.

At HP, we share our users' passion for the game, and we continue to provide the best-in-class products and experiences to cater to their needs. We are committed to raising and developing the gaming community to encourage creativity and innovation while also providing a safe environment for all types of gamers. As a brand, we analyze and understand consumer behavior and continue to innovate our offerings for all types of gamers. **[1]**
