

KILLER RIGS

Be it retro or be it M.E.T.R.O., we've got a gaming PC for your budgets!

Here's a very likely scenario - your friend is planning to buy a new gaming PC. Obviously, you would want to help out a dear friend, wouldn't you? You would certainly help him identify the right components, then hunt down the best deals and even accompany your friend as he goes about buying all the necessary components. That's when you realise that you can build a pretty good gaming PC for cheap! And if you can one-up your friend, then there's nothing like it.

Your buddy's PC

Explanation - Jumping on the Intel 13th Gen bandwagon, you and your friend have managed to come up with a configuration that's bound to easily last him four to five years. They're going to be playing Returnal on PC with all the ray tracing magics and they'll also be boasting about the same. And you will be there, standing in awe of their glorious PC!

Your PC!

Explanation - Boasting is a bad thing. So you need to serve your buddy some humble pie. Enter ... the build that's going to give your buddy some food for thought. This build has a better processor and a slightly better GPU, more storage space and DDR5. The last bit might not help much with getting more FPS but it'll certainly help with bragging.
