

Portless Design

The port-less iPhone concept has been a popular topic in tech circles for a while. Apple's recent moves towards wireless charging and the omission of a charging brick from their phone packaging indicate a possible transition to a port-less design. The introduction of MagSafe for the iPhone 12 series was a major step forward.

Holographic Face-ID and FaceTime:

Holographic display technology is an exciting development in the world of tech. It is conceivable that Apple might introduce holographic Face-ID and FaceTime features in future iPhones. Companies like RealView Imaging and Leia Inc. have already demonstrated holographic display prototypes, which shows it's not that far.

AI-speculated features & specs of hypothetical iPhone Fold Max

Display:

- Foldable Super Retina XDR OLED Display, LTPO2
- 6.8-inch front (unfolded: 7.8-inch)
- Resolution: 3330 x 1440 pixels (unfolded: 1080 x 2316 pixels)
- 144Hz ProMotion refresh rate
- HDR10+ support, Dolby Vision X

Design:

- Foldable design with seamless hinge technology
- IP69 dust/water resistance
- Haptic button feedback for volume, power, and mute

Dimensions:

- Folded: 162 x 77 x 12 mm
- Unfolded: 162 x 154 x 6 mm
- Weight: 280 g
- Colours: Space Gray, Silver, Gold, Pacific Blue

Camera:

Rear cameras:

- 108 MP, f/1.8, Wide
- 48 MP, f/2.4, Ultra-Wide
- 12 MP, f/2.2, Telephoto, 5x optical zoom

Front camera:

- 32 MP, f/2.0, Wide
- 3D Holographic FaceTime calls
- 8K video recording
- Action Mode

Performance:

- A21 Bionic chip with 3nm process technology
- Octa-core CPU (2x3.8 GHz + 2x3.46 GHz + 4x2.5 GHz)
- Apple GPU (6 core graphics)
- 8GB / 12GB RAM
- 512GB, 1TB, and 2TB storage
- iOS 17; updates for 5 years
