POCO X5 Pro v/s Motorola Moto G73

Gaming and Camera Comparison between the POCO X5 Pro and Moto G73

Dhriti Datta | dhriti@digit.in

We've got a new phone from Motorola in the mid-range segment - the Moto G73 and boy, is it a stunner! But looks aside, should you care about this phone and even invest your hard-earned money into it? This is a question a comparison would answer well, and to give the Moto G73 a bit more of a challenge we are pitting it against another phone that launched not too long ago but impressed us with its performance - the Poco X5 Pro. We decide to compare the phones' gaming and camera performance. We threw cameras in the mix since Motorola has stated that they've improved its camera system with

the new Moto G73. So, let's see which mid-ranger comes out on top!

POCO X5 Pro and Moto G73 Specifications

First, let's run down the internal and camera specifications of the Moto G73 and Poco X5 Pro. The Moto G73 is India's first phone with the new MediaTek Dimensity 930 SoC. It comes with 8GB RAM, 128 GB internal storage, and Android 13 with Moto's MyUX software. For optics, you've got a 50 MP main camera, and an 8 MP ultrawide + macro + depth camera. Finally, the phone features a 16 MP sensor for selfies. The POCO X5 Pro, on the other

hand, comes equipped with the reliable of Qualcomm Snapdragon 778G processor, 6 GB RAM and 128 GB internal storage on the base variant. You've got Android 12 out of the box with MIUI 14 on top. The phone features a 108 MP main lens, an 8 MP ultrawide, and a 2 MP macro. Of course, for selfies, there's a 16 MP lens.

Gaming and Performance

Both these phones come equipped with powerful budget to mid-range SoCs that proved their mettle in our tests. Do note that the POCO X5 Pro costs ₹4,000 more than the Moto G73 for the base 6 GB + 128 GB variant, and costs ₹6000 more for
