Laptops

Infinix X1 Slim

The Infinix X1 Slim is a 14-inch thin and lightweight laptop powered by a 10th Gen Intel

Core i3 processor. It comes with 8GB RAM, 256GB SSD and weighs only 1.24 kg. The laptop offers a 14-inch IPS panel with 300 nits of brightness. The I/O ports in this laptop include a USB Type-C port, a USB Type-C data transfer port, a USB 3.0 port, an HDMI 1.4 port, a dedicated SD card slot and a separate microphone and headphone jack. The laptop also provides a stylish look keeping performance in mind. It comes with a 65W Type-C fast charging support that can charge the battery up to 60% in just 55 minutes. The brand claims that this laptop charger can also charge your phone as well which eliminates the need to carry a separate charger.

₹29,990

RedmiBook 15 Pro

The RedmiBook 15 Pro comes with a Full HD (1920 x 1080) Resolution 15.6-inch display

that should serve you well for some light gaming and content creation needs. Plus, the size of the display means that you will be able to fit in a lot of content when completing assignments. Powering the machine is 11th Gen Intel® Core™ i5-11300H which comes with Intel® Iris® Xe Graphics, coupled with a 8GB DDR4 3200MHz RAM. This means that almost all the work that you have as a student should not be a problem. The port selection and build quality is solid for the price, and it weighs 1.8 KG, which means that lugging it around campus will also not be that big of an issue for you.

Acer Aspire 5 Gaming

The combination of Intel 12th Gen Core i5-1240P and the Nvidia RTX 2050 makes the Aspire 5 a highly affordable gaming machine as well. In addition to adding gaming prowess, the Aspire 5 is also a great everyday work laptop thanks to a good keyboard and trackpad combination. As a result, the Acer Aspire 5, priced at around ₹60,000, is a great value-for-money portable gaming laptop.

Smartphones

OnePlus Nord CE 3 Lite

The OnePlus Nord CE 3 Lite is a well-rounded smartphone that offers excellent performance in key areas such as battery life and camera quality. The Snapdragon 695 is also a reliable chipset that can be used without a hitch for tasks such as gaming,

web browsing, social media, and more. However, its camera setup is limited since it doesn't offer an ultrawide lens that many of its competitors do.

₹19,999

iQOO Neo 7

The iQOO Neo 7 performs well on all aspects it was expected to. It's a super performer. Almost too good for a mid-range smartphone, it has a vibrant and responsive AMOLED display, and you get a pretty decent set of cameras. The battery drains a bit too quickly in some cases, but the super-fast charging more than makes up for it. The design of the smartphone doesn't stand out as such, but then again, those who will buy this smartphone won't care much about the design.
