

Moto G40 Fusion

Powered by the capable Qualcomm Snapdragon 732G chipset, the Motorola Moto G40 Fusion is adept at handling gaming

with ease. The Snapdragon 732G is known for being one of the best gaming chipsets in this budget segment. Add to that a massive 6.8-inch display with 120 Hz refresh rate, and you've got a phone that feels smooth to use whether you're gaming or simply scrolling through apps. Plus, you've got a long-lasting 6,000 mAh battery for those marathon gaming sessions.
