

Innovative Cybersecurity Startups

Guardians of the internet for many

Ichha Sharma | feedback@digit.in

Cyber security plays a pivotal role in maintaining the balance in cyberspace by providing the optimum aid for data privacy and data security for individuals and organisations. Now, with the internet no longer being a choice of access but a necessity, utilisation of information and input of personal data has become inevitable. This raises a lot of concerns in regard to the threats of security for data and the safety of a user in cyberspace.

To battle the threat of cybercrime, it is imperative for the users to be agile and vigilant about the data that is being put out on the internet portals. To render this service for the ease of the users there are cyber secu-

rity establishments that hold a set of solutions for the ever growing cyber threats. For instance, in 2021, the Air India data service provider SITA was attacked, resulting in leakage of personal data of 4.5 million passengers worldwide. In the same year, a data breach compromised the data of more than 1,90,000 CAT applicants.

After the pandemic, the significance of cyber security startups has risen, broadening the scope for advancement in the innovation of the platforms and research in the digital environment to identify simplistic yet effective solutions for the cyber hindrances. To understand the importance of cybersecurity in today's digital dominant world, we

need to be aware of the significance of the cyber security programmes for different branches. Especially, education, finance, banking, enterprises and healthcare. Data breach for these avenues can lead to the leakage of many stakeholders associated with the organisations. Here's our list about the cyber security startups that have an innovative outlook on the cyber security trends.

Securden

Securden, founded in 2017 by former Zoho executives Bala Venkataramani and Kumaran Balan, is a US and Chennai-based cybersecurity startup. The startup with its aim to solve cyber security problems aids at providing affordable and simple solutions with the latest technologies for innovative solutions.

Key Features/Services

- Enterprise Privileged Password Management
- Privilege Management For Servers, Endpoints
- Password Management For IT Teams
- Secure Remote Access Without VPN
- Endpoint Application Control

Wijungle

Wijungle is India's first unified network security platform that is trusted in more than 25 countries and offers security services to almost nine different markets including healthcare, enterprises, education, transport, hospitality, amongst others. The platform is a one-stop solution for all the network security solutions and comes with an easy learning curve to help organisations secure their servers and data effectively. Data Security Council Of India and CIO Review recognized WiJungle among the Most Innovative and Promising Product of The Year and also won the Frost & Sullivan New Product Innovation Award of the year 2019 in Cyber Security Category for Middle East, Africa and South Asia Region.
