

The package is fairly simple with a pre-formed plastic window letting

One the side farthest from the port is an LED strip that runs across the entire body. While it is customisable, the default flowing RGB pattern is pretty good on its own. If you've handled any of the previously released Special Edition external

We found the hard drive to average at 128.3 MB/s for write operations and 131.6 MB/s for read operations. While this is a far-cry from SSDs, it's still good enough for storing files that you'd need to move around on a day-to-day basis.

Like we mentioned, this is a pretty decent drive for your day-to-day storage needs. For the price of INR 6,999 this 2TB drive would end up costing you INR 3.5 per GB of storage space. Considering that an external SSD such as the Crucial X6 can give you much faster storage at INR 6.5 per GB, the Black Panther SE external hard drive still has its place in the storage market and makes for a good buy. Also, the added coolness factor should certainly work in your favour, especially if you are surrounded by Marvel fans.
