

# THE WHOLE WORLD IN MY HANDS:

## A personal journey through the history of handheld gaming

If there's one thing that gets me more excited than a banger MMA fight card it's the world of handheld gaming. I've had a love/love relationship with handhelds since the OG Gameboy and I'm looking to get the Steamdeck to see what the latest in handheld tech can deliver. There's something special about taking your favourite games on the road with you. I remember many a long car journey spent blasting away

at baby Metroids, smashing blocks and shooting bad guys. There's just something magical about that generation of gaming. Everything was new and there was a real buzz around the next big thing in the industry. Nintendo hit the goldmine with the Gameboy and has been a pioneer of the medium ever since. Sure, there were competitors like the Sega Game Gear and the Atari Lynx but nothing could stand up to the might of the Game-

boy. If you have ever gotten your hands on one of those grey rectangular boxes of delight, you'll know why it's such a cultural icon. There was nothing like it then!

The year is 1991. I'm 8 years old and my whole world is about to change. Being a small kid in a small town in India, gaming wasn't the first thing that came to mind in terms of entertainment. We were more the get dirty in the mud, swimming in the
