

Carl Pei confirms the Nothing Phone 2 will be a flagship

Carl Pei has announced Nothing Phone 2 will run on Qualcomm Snapdragon 8+ Gen 1 SoC. He tweeted the same and also detailed the key differences between it and Phone 1. We'll get to that comparison. And we will also address the fact that SD 8+ Gen 1 might not be the latest and greatest, but it still makes great sense for Nothing to use it.

Carl Pei compares Snapdragon 8+ Gen 1 vs Snapdragon 778G+ (inside

Nothing Phone 1):

1. Carl says there is an 80-per cent performance bump on SD 8 Plus Gen 1 from the SD 778 Plus within

the Phone 1. He also quotes a 2x improvement in app-opening speeds.

2. He also highlights the benefits in terms of battery life, heat management, network connectivity, and camera capabilities from TSMC's 4nm Snapdragon 8 Plus Gen 1.
3. The new chip also brings an 18-bit ISP and camera features like Raw HDR and 4K 60 fps recording.
