

Intel Core i9 Laptops

Most powerful laptops out there

Manish Rajesh | manish@digit.in

When it comes to productivity and content creation, powerful processors with plenty of cores and threads can greatly cut down on the time it takes for you get things done. These processors make multitasking a cakewalk, and paired with a powerful GPU, these laptops will knock gaming performance out of the park. This list mostly consists of high-end gaming and creator laptops which feature Intel Core i9s. We've also got a wide range of i9 variants in this list, such as the Alienware X17 R2 with the Intel Core i9-12900K and the Acer Predator Helios 300 with the i9-12900H. Don't worry, we've even mentioned Intel Core i9 laptops which won't break the bank, such as the Dell G15 5520 and the Infinix Zero Book Ultra. If you're looking for the best Intel Core i9 laptops in India, we've got you covered.

OMEN BY HP 17-CK2004TX

We start things off with the 2023 variant of the OMEN by HP 17, which is their current highest-end model featuring the latest 13th gen Intel Core i9-13900K, paired with an

RTX 4080 GPU. When it came to processor benchmarks, the HP OMEN 17 was leagues ahead of all the other laptops on this list, all which we have tested. For reference, the HP OMEN 17 scored 27536 in the Cinebench R23 n-thread benchmark, which was almost 10000 points higher than our highest performing laptop CPU from last year! Even when it comes to gaming performance, we saw an average improvement of 21 percent in our gaming benchmarks over our previous best laptop as well. We saw close to 400 FPS on Valorant, 200 FPS in Shadow of the Tomb Raider and 250 plus FPS in Civilisation VI during our real-world gaming benchmarks. With both the laptop processor and GPU being from the latest generation, the OMEN 17 certainly has a leg up on the competition. We will update this list as and when we test newer gen Intel Core i9 laptops. For now, the HP OMEN 17 is the best Intel i9 Laptop you get your hands on in India.

MSI Raider GE67HX 12UHS

The MSI Raider GE67HX was our best performing gaming laptop until last year, and even took home our Digit Zero1 Award. It features a 12th gen Intel Core i9-12900HX, which

is no slouch and can easily compete with desktop grade Intel Core i9 processors of the same generation. It scored 18243 points in the Cinebench R23 n-thread benchmark, and while that looks a lot less than the score on the OMEN 17, this is still a fantastic score. This processor is paired with an NVIDIA RTX 3080 Ti to give you a beast of a gaming laptop, which will still provide you with a top of the line gaming experience. We're talking close to 300 FPS in games like Valorant, and 100 plus FPS in titles like Metro Exodus, Assassin's Creed Valhalla and Shadow of the Tomb Raider. It does fall short of the new 13th generation Intel Core i9 in benchmarks, but you won't regret going for this either.

Gigabyte AERO 16 YE5

While the first two laptops on this list are very obviously gaming laptops, the Gigabyte AERO 16 is a powerful creator laptop. This laptop comes with the 12th gen Intel Core

i9-12900HK -- a slightly weaker variant of the HX, which is paired with the NVIDIA RTX 3080 Ti and a fantastic 4K display for your video and photo editing needs. In our tests, the laptop scored 13310 points in the Cinebench R23 n-thread benchmark, and 100 percent coverage in both sRGB and DCI-P3 coverage. With the powerful hardware on board you should have no trouble with your rendering needs as well. The laptop also comes with decent I/O support, and a surprisingly sleek and slim design, ensuring its place as the best Intel Core i9 creator laptop you can pick up right now
