

Mobile phones for gaming

Keep the grind going always

Sushant Talwar | sushant@digit.in

Gaming on smartphones is growing at a fast pace and with each passing day, the army of smartphone gamers is growing only stronger. For this growing breed of new-age gamers, smartphone makers are launching powerful gaming focused smartphones which can handle not just apps of daily use, but also graphics intensive applications and resource intensive games. While there are many gaming phones in the country that fit this description, like the Galaxy S23 Ultra, OnePlus 11, Vivo X90 Pro, the best gaming phone in India at the moment is the iQOO 11. All these phones offer very good experience in games thanks to their powerful flagship-grade hardware and in some cases also rich, gaming-centric feature set to help them stand out from the crowd. So if you're in the market for a new smart phone for gaming then your search ends here. Here's a look at the best ones you can buy.

iQOO 11

iQOO 11 is the best phone you can buy in India for gaming right now. It is as powerful as they come and offers some key gaming first features to enhance your experience when you decide to game on the device. At the heart of these experiences is the Snapdragon 8 Gen

2 SoC Qualcomm that can power anything and everything you throw at it. The chipset is generally power efficient, but the iQOO 11's impressive handling of thermals ensures the Snapdragon 8 Gen 2 remains very stable on the device even when the SoC is pushed to handle CPU and GPU intensive tasks. But as mentioned above, it is the gaming first features, some of which are even baked into the phone's hardware that set it apart from the competition. It also gets a dedicated Game Space which acts as the hub for all things gaming and can display the games you have installed, device's CPU, GPU, and temperature performance, among other gaming statistics, for example number of hours you've games in the the week and which games you play the most.

Samsung Galaxy S23 Ultra

While the Galaxy S23 Ultra isn't marketed as a standalone gaming phone, and is a device that offers good performance in all aspects of interest for a flagship phone buyer, what cannot be ignored is just how good at gaming this new

phone from Samsung is. Again, at the core of such experiences is the Snapdragon 8 Gen 2 SoC, which is going to remain a regular fixture through this list of best gaming phones in India. But if the 8 Gen 2 is good for gaming, what makes the S23 Ultra better than most other devices with this chip is the fact that it uses a slightly more powerful version of this chip under the hood. Yes, on the device you get a custom Snapdragon 8 Gen for Galaxy SoC, that offers higher base clocks for performance cores than what you'd find on other devices in the list. Plus, because of its new and improved vapour cooling chamber, that's significantly bigger than the one found on its predecessor, the Galaxy S23 Ultra emerged as one of top-ranked phones for gaming in India.

Apple iPhone 14 Pro Max

While Apple is also not the one to market their phones explicitly as gaming phones, it cannot be ignored just how good some of their phones are for gaming. Especially, the flagship devices, which year after year, impress with

their performance in games. Majority of the credit for this should go to its high-performance chipsets that often set the benchmark for performance. Similar is the case this year, with the A16 Bionic SoC totting iPhone 14 Pro Max running circles around graphically demanding games with the sheer muscle it hides under the hood. The phone has enough juice to power any game you throw at it – rather available on the App Store. It also has a big battery and an equally big, fast refresh rate display paired to this chipset to bring to life some really immersive gaming experiences on
