

Active Noise Canceling (ANC) Earbuds

Tuning into great music...

Satvik Pandey | satvik@digit.in

If you work in a noisy environment or prefer some time for yourself, listening to music while the world around you goes crazy, active noise-cancelling earbuds are a must. However, in the last couple of years, there has been a massive influx of offerings from brands across price ranges. You can find ANC earbuds priced as high as ₹27,000 to as low as ₹2,999. As usual, the consumers are faced with a problem of plenty. When buying ANC earbuds, you have to make sure that they fit well in your ears as well.

In this list, we have shortlisted 10 of the best-performing ANC earbuds that you can get your hands on right now. There are offerings from Samsung like their Galaxy Buds 2 Pro sitting on the top of the charts, and the Oppo Enco X2, which for the price races past its competitors in the space.

Now, with that out of the way, let's get to our list of the best active noise-cancelling earbuds in India –

Bose QuietComfort Earbuds II

Bose QuietComfort Earbuds II are the best ANC earbuds available in India right now. Bose has been a key player in the audio market for some time now, and all that experience trying to perfect their

products reflects in the Quiet Comfort Earbuds II. What they lack in passive isolation due to their shape, they make up for in the ANC department. These earbuds are especially effective in the low end of the frequency range and continue impressing with their performance as go up the charts. This means that the noise that you'll be hearing will be minimal.

Sony WF-1000XM4

Probably one of the most well-rounded earbuds on this list, the Sony WF-1000XM4 TWS earbuds only lost out on the top spot because they fell slightly behind the Bose QC

Earbuds II in terms of pure ANC performance. With the foam tips supplied along with the earbuds, the fit is great, meaning overall improvement in ANC. The differences between Bose's offerings are hard to find at first, but once you are out and about with these earbuds, you

will understand there's a hint of more noise that bleeds through when you have ANC on. In terms of features and all other aspects, these trump the QC Earbuds.

Samsung Galaxy Buds 2 Pro

Winner of Digit Zero1 Awards 2022, the Samsung Galaxy Buds 2 Pro are another well-rounded pair of TWS earbuds, considering their price, which at the time of writing was ₹15,999. In our testing,

we found that the three high Signal-to-Noise ratio microphones in each of the earbuds did a great job at suppressing background noise in most cases. If you get the optimal fit, these earbuds will serve you well in day-to-day use. If only these earbuds came with wing tips, the fit would have gained a higher position. The features they bring to the table make them play with the top players in the market, giving them stiff competition for the most part.

Apple AirPods Pro (2nd Generation)

Apple's entry into this list comes with the Apple AirPods Pro (2nd Generation). These are literally the best noise-cancelling earbuds for people who are a part of the Apple Ecosystem.
